

# YARD BUG SPRAY

Lethal to Ants, Aphids, Beetles, Caterpillars, Crickets, Fleas, Ticks & more! See below

Treats up to 5000 sq ft

For Lawns, Landscapes & Perimeters

## Read Entire Label and Use Accordingly.

Maggie's Farm Yard Bug Spray for Lawns, Landscapes and Perimeters is a ready-to-spray product that is lethal to bugs, killing the most common outdoor lawn, landscape and perimeter pests. Using plant oils as the active ingredients in a water-based formula, it's safe for you and your family when used as directed.

Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

### Product Overview

**Kills & Repels:** Ants (including Carpenter Ants), Aphids, Asian Lady Beetles, Boxelder Bugs, Caterpillars, Centipedes, Cockroaches, Crickets, Cucumber Beetles, Earwigs, Fleas, Flies, Firebrats, Leafhoppers, Millipedes, Mites, Mosquitoes, Moths, Pillbugs, Scale Insects, Silverfish, Springtails, Ticks, Wasps, Weevils and Whiteflies.

**Where To Use:** Lawns, trees, bushes, ground cover vegetation, ornamental plants, mulch and straw beds, and around building foundations (perimeter treatment).

### DIRECTIONS FOR USE

**Always read label directions and precautions prior to use. Shake well before use and periodically during use.**

**Sprayer Directions:** Attach the bottle nozzle to a garden hose. Make sure the nozzle is in the "OFF" position, and turn on the water spigot to fully open. Extend hose to the farthest area to be treated. Hold the bottle upright and point nozzle towards the treatment site (not the ground). Bend the small plastic safety tab with your thumb and turn to "ON". Begin spraying, working back towards the spigot. The bottle will empty after 10-12 minutes of spraying. To stop spraying, turn to "OFF" position. Turn the water off. To relieve pressure before disconnecting nozzle from the hose, turn dial to "WATER" until the water stops. Then turn back to "OFF" position and disconnect from hose.

**Treatment Directions:** This bottle is designed to cover up to 5000 sq ft. For preventative treatment and light infestations, apply at a rate of 500-600 sq ft per minute. For heavy infestations apply at a rate of 250-300 sq ft per minute. For best results, wait a day or two before mowing or watering the treated area. Reapply monthly, or as needed.

**Lawns:** For lawn pest treatment, spray in a sweeping motion to cover the target area, overlapping the spray to get total coverage.

**Trees, Bushes and Heavy Vegetation:** For plant pests, mosquitoes, ticks and other listed pests that harbor in heavy vegetation, spray thoroughly to ensure treatment reaches deep into vegetation, versus just spraying the top. Spray foliage to the point of runoff.

**Ornamental Plants:** For aphids, beetles, caterpillars, leafhoppers, scale insects, weevils and whiteflies. Spray on the underside of leaves as much as possible. Only apply at the lower rate (500-600 sq ft per minute) to minimize potential for burning delicate plants, and apply late in the day.

### Active Ingredients:

Thyme oil .....3.13%  
2-Phenylethyl propionate .....2.19%  
Rosemary oil .....1.25%

**Inert Ingredients:**\* .....93.43%  
Total .....100.00%

\*Water, Polyglyceryl oleate, Wintergreen oil, Isopropyl myristate

\*When used as directed

SAFE FOR PEOPLE  
PETS & PLANET\*

WOMEN  
OWNED

NWBOC CERTIFIED

KEEP OUT OF REACH OF CHILDREN

**CAUTION**

NET CONTENTS: 32 FL OZ

### Building Foundation (Perimeter Treatments):

To help prevent ants, boxelder bugs, centipedes, cockroaches, crickets, earwigs, fleas, firebrats, lady beetles, millipedes, silverfish, sowbugs/pillbugs, spiders and springtails from getting inside the house, spray the lower portions of the foundation and the ground along the perimeter to about 3 feet out. Do not spray siding.

### Precautions

-We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and skin and avoiding directly breathing spray mist. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If more than an incidental amount is swallowed, seek medical attention. Give one glass of water and do not induce vomiting. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. If seeking medical treatment, have this label with you.

-We recommend waiting until the spray is dry before allowing children or pets back into the treated area.

-Do not apply to food or trees/plants grown for food. If the spray contacts a food surface like an outdoor dining table, wash with water and dish soap before using for food.

-Keep out of lakes, streams and ponds.

-Do not apply to flowering plants if pollinators are in the area.

-We've tested the product on various types of plants without causing any burning or browning, but test treat a small area first to be certain. If you're concerned about plant sensitivity, apply at dusk and be careful not to over-apply.

**Storage & Disposal:** Store in a cool, dry area out of reach of children and upright in the original, closed container. Don't reuse the container. Dispose of in trash or offer for recycling if available.

**Limitations of Liability:** Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except on this label. Buyer assumes all responsibility for safety and use not in accordance with the label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.
