## RING SIZER GUIDE

Using a Ring which already fits into your finger follow these steps:

1. Print this page without applying any scaling to the print. Scale 1:1 on A4
2. Measure this line using a ruler to make sure the print scale is accurate.

3. Choose your ring size by placing your ring on the sheet and finding the matching circle.

- If your size is in between two circles, choose the larger size.
- Make sure to take into consideration that when placed on a finger, the ring must pass the finger joint.
