

HOW TO MEASURE FOR TUCCI TIME BOOTS

The measurements must be taken wearing riding breeches and socks that you normally use. Please refer to size charts to determine proper boot size.

Shoe Size: The same size that you usually wear:

EU	US	
	MAN	WOMAN
35	-	5 - 5.5
36	-	5.5 - 6
37	-	6.5 - 7
38	-	7.5 - 8
39	-	8.5 - 9
40	-	9
41	-	9.5 - 10
42	8 - 8.5	-
43	9	-
44	9.5 - 10	-
45	10.5 - 11	-
46	11.5 - 12	-
47	13	-

After determining foot size, please refer to the **Tucci Time** chart to select boot size based on calf size and boot height measurements shown in centimeters:

Calf Size: While standing, measure the circumference of the calf at its widest point, keeping the measuring tape horizontal and neither too tight or too loose.

Boot Height: Stand with leg slightly bent, measure from the floor to the highest part of the leg behind the knee. To this measurement, you must add 1.5cm, as the boots will lower with wear.

For questions about sizing, please contact us at hadfields@aol.com or call us at 1-800-854-RIDE.
