

TankBuddy[®]

Floating Tank Inlet 32mm

APPLICATION

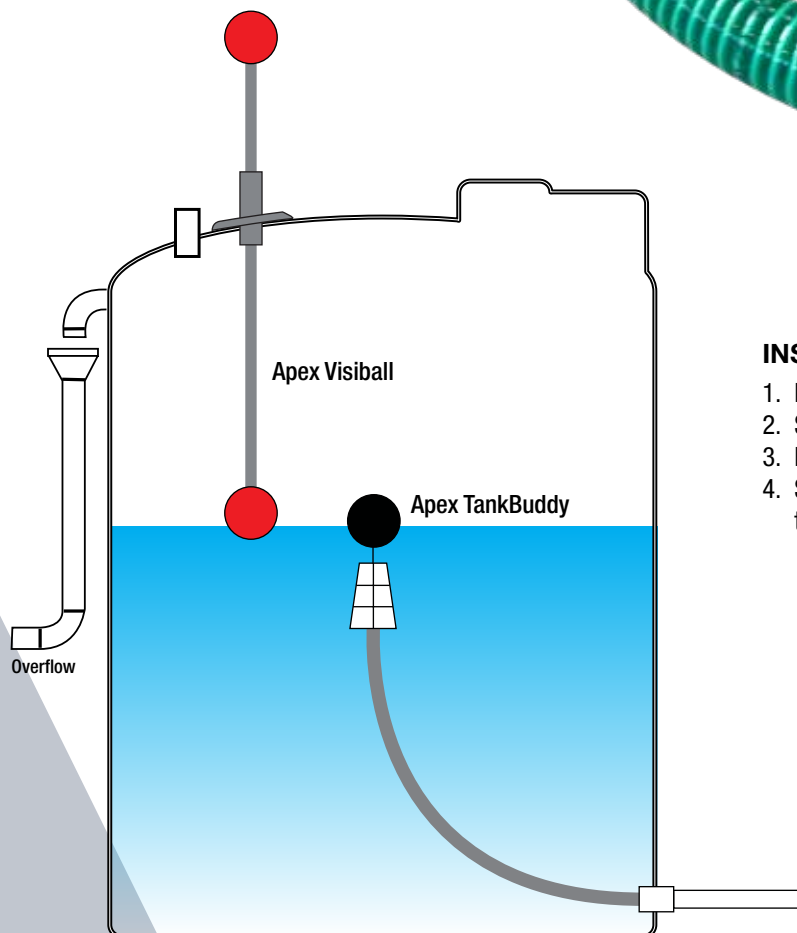

Install in storage tanks/reservoirs to ensure clean water to the outlet. TankBuddy provides the freshest water to be drawn out of the tank with minimum need for servicing or maintenance.

FEATURES/BENEFITS

- Clean water - water is drawn from the top of the tank
- Reduce the risk of drawing contaminated water or sediment

NB. Modifying the product may restrict water flow and/or restrict performance

***IMPORTANT:** Apex recommends a two person installation. Refer to AS2865: Confined Spaces prior to entry and working in a confined space.

INSTALLATION INSTRUCTIONS

1. Empty the water tank.
2. Screw in male coupling to the fitting inside the tank.
3. Fit Hose to the male coupling and tighten the blue nut.
4. Screw screen (with float attached) to female coupling on the other end of the hose.
