

CAST IRON WAFER CHECK VALVE MODEL - WCV1

FEATURES AND BENEFITS

- Features excellent retaining performance, high safety and reliability
- Low flow resistance
- Effective in preventing backflow of the medium, reducing water hammer.
- No maintenance required
- Two torsion springs exert pressure on the pair of disc which close the discs quickly and automatically.
- The quick close action prevents the medium from backflow and eliminates water hammer.
- Easy to install
- Can be installed both vertically or horizontally
- Larger sizes equipped with eye bolts to assist with lifting and installation.

ITEM	COMPONENT	MATERIAL	GRADE
1	Body	Cast Iron	AS1831
2	Seal	Nitrile	AS1646
3	Disc	Stainless Steel 316	ASTM351 CF8M
4	Stem	Stainless Steel 316	ASTM 276 304
5	Spring	Stainless Steel 316	ANSI 304

TECHICAL SPECIFICATION

Construction: Dual Plate Wafer Check Valve

Size: 50mm - 600mm

(Larger sizes available upon request)

Pressure Rating: PN16

Face to Face: ISO5752 Series 16

Flanging: Suits AS2129 Table E & D, AS4087 B5

Coating: 2 Pack Epoxy

Temperature Range: -10°C - 80°C

Pressure Testing: Shell— 24BAR

Seat—17.6 BAR

APPLICATIONS

Challenger Valves and Actuators are the **“Right Choice for Valves and Actuation”** when quality matters.

Servicing industries such as: Textile, Water Treatment, Irrigation, Energy & Light Industry
