## DUAL STATION HEAT PRESS MACHINE

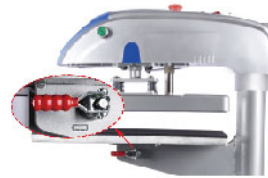

The dual Station heat press is top-of-the-range of heat press when it comes to mass production. Its automatic electric motor pressing provides high efficiency and excellent pressure control without manual pressing force. It also comes with fully automatic and semi automatic mode with adjustable left-right motion speed. The heat press can be up to 50% more efficient than a single station model.

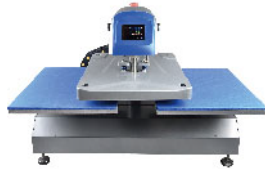

### Motorised Press

Automatic press down with adjustable force up to 360kg and accept Max of 4.5 cm thickness.

### Threadable and Interchangeable base

Threadable design allows to drop seams, zipper fronts, and button areas off the press providing a smooth even print surface. Quick interchangeable base enable you to work with different accessories

### Dual Station

The dual station allow you to setup second job while the first job still pressing. This will reduce the press idle time.

### Advanced LCD Controller

The advanced controller allow you to set temperatue, pressure, timing and standby mode. It also has a counter to keep track of quantity pressed

## Specifications:

Model	E - 2N
Heat Plate	40cm x 50cm
Work Station	2 * 40cm X 50cm
Press Method	Motor
Controller	LCD Controller
Max. Pressing Force	360kg
Max. Temperature	232°C
Power Requirement	240V, 10A, 2.2KW
Dimension	94.7cm X 82cm X 71.7cm
Packing(L*W*H)	110cm X 83cm X 87cm
Net Weight	125kg
Gross Weight	140kg
