DUAL STATION PRO HEAT PRESS MACHINE

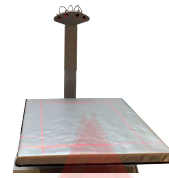

The dual Station Pro heat press is top-of-the-range of heat press when it comes to mass production. Its automatic electric motor pressing provides high efficiency and excellent pressure control without manual pressing force. It also comes with full and semi automatic mode with adjustable left-right motion speed. The full automatic mode has 3 preset press timing for DTF application. There is laser guide for fast alignment of prints. The heatpress is seated on a rigid table with wheels.

Motorised Press

Automatic press down with adjustable force up to 360kg and accept Max of 4.5 cm thickness. Height of the press can be set to hovering and not touching the T-shirt for Pretreatment curing.

Laser Guide

Four laser guide on each Platen to serve as guide for fast loading of T-shirt and Printed film. Each laser can be position individually.

Dual Station

The dual station allow you to setup second job while the first job still pressing. This will reduce the press idle time.

Advanced LCD Controller (New)

The advanced controller allow you to have 3 preset timing and 1 set of pressure and temperature. This setting is very helpful for DTF and applications require different press time.

Specifications:

Model	E - 2N-Pro
Heat Plate	40cm x 50cm
Work Station	2 * 40cm X 50cm
Press Method	Motor
Controller	LCD Controller
Max. Pressing Force	360kg
Max. Temperature	232°C
Power Requirement	240V, 10A, 2.2KW
Dimension	95cm X 76cm X 142cm
Packing(L*W*H)	110cm X 83cm X 87cm 97cm X 63cm X 17cm
Net Weight	155kg
Gross Weight	180kg
