Raised-Edge Thimble™ Measuring Instructions

To find your Raised-Edge Thimble™ size, you need to measure the circumference of your finger.

MEASURING - Measure in metric or inches, but metric will be more accurate.

Thimble Size	Metric	Inches
4	41mm	1 5/8"
5	42mm	1 5/8"
6	44mm	1 3/4"
7	45mm	1 3/4"
8	47mm	1 7/8"
9	50mm	2"
10	53mm	2 1/16"
11	56m	2 3/16"
12	57mm	2 1/4"

1. Wrap a narrow 1/8" strip of adhesive tape or paper around the first knuckle of your finger.
2. Place a mark where the end rests against the wrapped strip.
3. Remove the tape or paper strip from your finger and measure its length from the end of the strip to the marked point. Repeat this process a few times until you are consistently getting the same measurement.
4. Select the corresponding size closest to your measurement.

NOTE

Colonial Needle products are 100% guaranteed. If you find the thimble you receive does not fit properly, it may be returned. However, contact us before returning the thimble. By speaking with you about how the thimble feels, we may be able to find a better fitting size.
