

NOTES

ROXANNE THIMBLES

Roxanne Quilting needles use a totally different system Sized 2.5 to 10.

Using a ring sizer to fit snugly between the cuticle and last knuckle of the “thimble finger”, and adding 1 to that ring size will give the Roxanne thimble size

Contact the Colonial Needle Company for more help or more information. (914 9467474) or www.colonialneedle.com)

ROXANNE THIMBLE SIZING CHART

Roxanne size	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10
MM diameter at base	11.5	12	12.5	13	13.5	14	14.5	15	15.5	16	16.5	17	17.5	18	18.5	19

These are approximations since Roxanne thimbles are cast and minor variations may occur, especially after being plated with silver or gold. To find corresponding regular thimble sizes see chart on reverse.

QUILTERS NOTE: fingers shrink after quilting a while, so buy SNUG fitting thimbles

MARKINGS ON THIMBLES

USA law requires all imported products to be marked with Country of Origin, either on the product, or if that is impossible, on the packaging.

Thimble sizes in the USA are not regulated by law.

Continental Europe uses Millimeters Internal Diameter (MM) measured at the rim. This number usually appears in the apex

CE means Conformité Européenne. (conforms to European Safety Standards).

SOME MATH

Circumference is Diameter times 3.14

Diameter is Circumference divided by 3.14
