"THE ENIGMA COLLAR," GOLD COLLAR NECKLACE WITH BEZEL-SET WHITE DIAMOND CABOCHON EMERALDS FROM MUZO, ONDYN X MUZO, MUZO.CO

"EMERALDS CELEBRATE REBIRTH AND RENEWAL FOR SPRING. THEY'RE IMBUED WITH GOOD FORTUNE FOR THE MONTH TO COME."

—Tara Maria Famiglietti,
founder and designer at Ondyn

GEMINI

MAY 21–JUNE 21

Stop pretending to be Super Gemini. You'll be amazed by who chips in when Jupiter enters your teamwork zone from May 10 through October 28. Self-care could be a lifesaver near the total lunar eclipse on the 16th: Just be ready to get your engines moving when the annual new moon in Gemini hits on May 30.

CANCER

JUNE 22–JULY 22

When lucky Jupiter returns to your tenth house from May 10 to October 28—for the first time since 2011—sacrificing some freedom for success is a worthy trade-off if it aligns with your goals. The total lunar eclipse on May 16 could bring romantic developments. But don't confuse a shallow connection with something real.

LEO

JULY 23–AUG 22

Free-spirited Jupiter can help you cede control starting on May 10, as it begins a five-month journey through your liberated ninth house. Changes could happen suddenly, thanks to the total lunar eclipse on the 16th. Mull your options now, so you can hit the gas when Mercury ends its May 10 to June 3 retrograde.

VIRGO

AUG 23–SEPT 22

Squeeze in thrills while you can before the 10th. With Mercury turning retrograde and Jupiter diving into your private eighth house, you'll be living quietly. As work becomes demanding, Jupiter helps you stoke sexy embers until October 28. You may end a romance near the total lunar eclipse on the 16th.

LIBRA

SEPT 23–OCT 22

Set your GPS for "Peak love experiences." With risk-taker Jupiter revving up your relationship house from May 10 to October 28, either go all in with your other half, or cut ties with someone who's been stringing you along. Work-wise, you'll dive into a more lucrative pond near the total lunar eclipse on the 16th. Raise your rates or shop around. But with Mercury retrograde from May 10 to June 3, focus on what you know over experimentation.

SCORPIO

OCT 23–NOV 21

Connections are hitting their stride this May, but the big news is the Scorpio total lunar eclipse on the 16th—the first in your sign since 2014. Jupiter shifting into your work zone on the 10th can spark lifestyle changes that amplify your glow. In relationships, you have an easier time giving, but with Mercury spinning retrograde from May 10 to June 3, your cosmic challenge is to graciously receive.

SAGITTARIUS

NOV 22–DEC 21

Your ruler, Jupiter, soars into your fame zone on May 10, aiming the spotlight at you until October 28. Pump up the volume on creative efforts—ideas could attract support near the total lunar eclipse on the 16th. Mercury turning retrograde in your partnership zone on May 10 could derail a relationship or delay a contract. Hang in there until it passes on June 3.

CAPRICORN

DEC 22–JAN 19

Make time for family, especially when Jupiter relocates to your domesticity house from May 10 to October 28. Caps in the market for a move could score a lucky listing—or try the digital nomad life. Group affiliations might become a sore spot near the May 16 total lunar eclipse. If you've been veering in a different direction, don't stick around out of habit.

AQUARIUS

JAN 20–FEB 18

Your experimental nature returns as Jupiter makes variety your favorite spice from May 10 to October 28. Near the total lunar eclipse, don't balk at responsibilities. An ex could lure you back while Mercury is retrograde from May 10 to June 3, but proceed cautiously. Bad timing can be forgiven; unrepentant bad behavior cannot.

PISCES

FEB 19–MAR 20

What's standing between you and success? If it's money-related, you're in luck! Abundant Jupiter spends five months journeying through your financial security sector, starting on May 10. Under the enterprising total lunar eclipse on the 16th, you may attract a global fan base or travel for work. When Mercury turns retrograde on May 10, family support may be less than hoped for, but don't be deterred.

ARIES

MAR 21–APR 19

For the first time since 2011, Jupiter swings into Aries, bringing some luck and opening a window for adventure from May 10 to October 28. Unexpected support may arrive in the form of funding with the total lunar eclipse on May 16. With Mercury turning retrograde, also on May 10, make sure you've tied up loose ends that could hold you back.

TAURUS

APR 20–MAY 20

This month, a quartet of planets visit Taurus and your trailblazing first house, inspiring you to rethink what you're capable of. But don't skip healing steps. On the 10th, Jupiter enters your soul-searching twelfth house, kicking off five months of reflection. Relationships could realign—or hit a tipping point—with the total lunar eclipse on the 16th. Their survival may depend on your willingness to relinquish some stubborn beliefs.
