### Your New Seat Requires Routine Care

While the upholstery in your seat is made to withstand the effects of sun, heat, rain and soiling under normal conditions, it is important to care for your seat by keeping it clean. Keeping your seat covered and protected against UV degradation, seal and pollen stains can dramatically reduce cleaning time. Care-painted vinyl is especially vulnerable to fading from excessive UV exposure. Use a cover that allows for ventilation, and keep plastic bags and tarps that cover the seat exposed for ventilation. Wash your seat at least once a year with Wise Marine Vinyl Cleaner. To dry, let air dry or use a soft, warm towel. Avoid direct exposure to sunlight if possible.
