DURALEX® YOUR BEST PARTNER

The tempering process: our trademark.

Since 1945, Durablex® has been the pioneer of tempered glass technology, a process we are specialists in. Our factory in La Chapelle-Saint-Mesmin was the first in the world to produce tempered glass tableware.

Thanks to our continuous research to improve the quality, resistance and reliability of our glass manufacturing processes, Durablex® has reached a level of excellence that enables success of the brand around the world. Our company is unquestionably recognized as the leader of tempered glass dishes.

Our legacy in Foodservice

Durablex® has been supplying schools canteens, cafeterias and hospitals in France from generation to generation, becoming a recognizable glassware manufacturer known to many.

Durablex® rapidly expanded its "savoir-faire" in the world in all continents and became a brand asked by name, present in restaurant chains, coffee shops and many hotels & resorts across the world.

Coffee is our specialty

Durablex® is actively participating in coffee competitions in the world. From "Cup of excellence" in Indonesia, the "Independent Barcelona Coffee festival" in Spain and the "World of Coffee Dubai". Durablex® is the number one brand for baristas, using our glassware for espresso and latte art.

Did you know?

According to a recent study in US, Latte is the most popular espresso-based drink, ahead of cappuccino and espresso.

3 WAYS TO SPICE UP

YOUR TEA OR COFFEE BREAK

A mainstay of the French art de vivre, the tea or coffee break has undergone countless changes over the years. Plant-based milk, experiment with the temperature of drinks, etc. Here are 3 ideas to make these special moments even more enchanting.

1. How about trying plant-based milk?

What better way to add a touch of fantasy to your tea or coffee break than to pour a splash of plant-based milk into your cup? A few drops are all it takes to transform your beverage. Watch as its Color changes from deep brown to a softer chestnut hue.

Then there are the flavours. Almond, hazelnut, hemp or soya... You name it. And depending on the milk in question, the tea or coffee takes on a fuller or more acidic flavour. So many options to create the ideal drink: the one that's just right for you.

2. Playing around with temperature

Some like it hot. For them, tea or coffee needs to be drunk steaming hot: it's at the perfect temperature when they can see wisps of steam rising out of the cup. Others prefer it iced, chilled or cold-brewed. That way, they can enjoy a brew even at the height of summer.

Whatever you prefer, our Durablex® cups allow you to drink your tea or coffee with peace of mind. All our products are EN 1183 certified, which means they are designed to withstand thermal shocks of up to 130°C.

3. Choosing the right cup

Tea or coffee breaks are also a matter of style. Whether you prefer espresso or lungo, enjoy your drink in one of our design classics. Those with more traditional tastes will appreciate the timeless simplicity of our Le Gigogne® cups.

Others will prefer the delicately sculpted lines of Le Picardie® collection, our best-seller across all categories. Unless, of course, they fall for the intoxicating curves of our Caprice mugs. After all... for every tea or coffee drinker there's a Durablex® to match.

THE MASS TINTED GLASS

Enhance your beverage service with Duralex® colored glassware! Le Picardie® Amber combines a stylish design with an eye-catching color that makes poured coffee look gorgeous inside the glass. Opt for Le Picardie® pink Blush color, the new trendy color perfect for a stunning latte art.

A Color that stays

Since 1961, we have been integrating mass tinted technology in almost all of our ranges. Colors are tinted in the mass, that is to say directly added to the glass when it is at a liquid state. For this, we use minerals (fully safe for health). When the glass solidifies, it captures the minerals. The characteristics of Colored glass are therefore identical to those of Clear glass and everything is safe for consumers!

The Color retains its brilliance throughout the life of the glass, resistant to dishwashers, shocks, sun fading or scratches.

Colors to decorate any table

At Duralex® we have in our catalogue 8 Colors tinted in the mass! Timeless, unbeatable, Duralex® glasses and plates have their own universe, allowing tables to be decorated according to desire, mood or just the season. Bohemian, glamorous, industrial atmosphere... our Colored tableware and dinnerware find their place on all tables and cover all styles as desired.

Promote mix & match! Look at different Color combinations to create a unique atmosphere and offer guests a real experience, different every season!

Did you know?

According to baristas, clear color and amber color are the best options for tasting. Colored glasses actually change the taste perception.
