DURALEX®

DEPUIS 1945

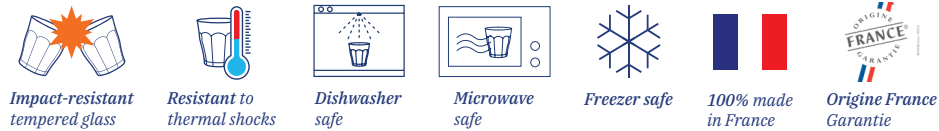

LE PICARDIE®
L'original

FOR EVERYONE, FOR EVERYDAY AND FOREVER

Why Durablex®?

Since 1945, Durablex® has been a pioneer in tempered glass technology – a process in which we are the industry leader. Our factory in La **Chapelle-Saint-Mesmin** was the first in the world to produce tempered glass tableware. Through constant investment and commitment to quality, Durablex® has achieved a level of excellence that drives the brand's success around the world. Our company is indisputably **recognised as the leader in tempered glass**. In addition to their design and practicality, our Durablex® products **have a number of advantages** to provide solutions for **hotel and restaurant requirements**.

With more than **350 different products** available from stock, the Durablex® catalogue is able to satisfy many expectations. With its **170 shapes** available in **seven colours**, our special production options enable professionals to serve their specific markets with the guarantee of **Durablex® quality**.

Why a tempered glass cup?

The Durablex® tempering process improves resistance to mechanical stress and thermal shock. It offers safety, convenience and durability by increasing the life span of products. **Tempered glass is safer, stronger and therefore more durable than standard glass**. The tempering process ensures that the glass is overall stronger and safer in the event of breakage (it breaks into small pieces). **The Durablex® glass is at least 3.5 times more resistant** to mechanical stress than an annealed (standard) glass product. It is resistant to **thermal shock of at least 130°C**. Our commitment to quality and regular testing guarantee stable tempering.

The Picardie® tumblers are easily stored making it ideal for every professional.
