RENEWABLE
ENERGY

The **PD240** is a Hand Held Metal Detector that combines **high reliability and ergonomics with advanced detection and operator signalling features.**

Effective sensitivity to all metals, full compliance with the latest Security Standards and high immunity to external metal masses are among the main peculiarities of this new device.

ADVANTAGES & BENEFITS

- Programmable Sensitivity
- Extended Continuous Operation Time
- Automatic Low Power Mode during Screening Pauses
- Embedded Long Life Rechargeable Batteries are renewable energy and eliminate the Operation Cost of Alkaline Batteries
- Embedded Fast and Reliable Battery Charger: no need of batteries removal
- Dedicated Holder acts as Minimum Space Table Stand and Mains connection for Battery Charge
- Operator Functions can be standard or customized by the user through PC GUI and USB connection

ELEGANT, ROBUST AND ERGONOMIC

The **PD240** features a **special ergonomic design consisting of an offset hand grip** which ensures that the operator's hand does not interfere with the sensitive detection area. This means fewer scans per person and therefore shorter inspection times per person.

Special care has gone into the mechanical design of the detector. **Absence of sharp edges or corners allows the detector to be passed smoothly over the inspected area** without getting caught in buttons, buckles, folds or other parts of clothing.

ADVANCED CONTROL PANEL

The control panel with buttons and warning lights is made from high-thickness silicon guaranteeing a high degree of protection to make the **PD240 suitable for indoor and outdoor use.**

FULLY PROGRAMMABLE SIGNALING

- Proportional/Fixed, High Loudness **Acoustic Alarm**
- Proportional/Fixed, High Brightness **Optical Alarm**
- **Vibration Alarm** for Discrete Screening

Optical indication proportional to the metal signal strength [Low, Medium, High].

Optical indication proportional to the radioactive substance signal strength.

- 1 Power push button
- 2 L low sensitivity
- 3 M medium sensitivity
- 4 H high sensitivity
- 5 Battery charge indicator
- 6 Acoustic alarm
- 7 Vibration Alarm
- 8 Visual alarm indicator

NIJ STANDARD 0602.02 COMPLIANT

The technical features of the detector **comply with the NIJ standard 0602.02 and the new NIJ draft standard 0602.03**. The **PD240** has uniform sensitivity to magnetic and non-magnetic targets including those made of stainless steel. At the same time the detector offers **excellent body-effect compensation** and has high immunity to external disturbance from electromagnetic and mechanical sources.

EXTENDED CONTINUOUS OPERATION TIME

The **PD240** is powered by two AA-size NiMH batteries with a **battery life of over 100 hours**. A Low Power Mode is automatically activated during periods of inactivity, extending the battery life up to 200 hours.

FULL DIGITAL DESIGN

The **PD240 is fully digital**. Electronic functions include an inspection field transmitter-receiver based on Digital Signal Processing [DSP] technology, a digital operator interface and external communications over the incorporated USB port. This **design combined with a special printed antenna ensures top reliability and very high repeatability**.

SOPHISTICATED COMMUNICATION CAPABILITIES

The digital design of the new metal detector also enables the **maximum flexibility in selecting the functions available to the user and how detection alarms are signalled**. Users can keep the factory settings or connect the detector over its USB to a PC and then personalize the settings with a dedicated graphic interface [HHMD configuration tool required].

HIGH IMMUNITY TO FLOOR REBARS

The **PD240 incorporates innovative technical solutions** which make it possible to operate much closer to floors with steel reinforcement bars than was previously possible with conventional hand-held detectors. All this without any reduction in sensitivity.
