

WALKTHROUGH CASTER SET

For use with PD-6500i

Made in the USA

Ideal for schools, special events and stadium use.

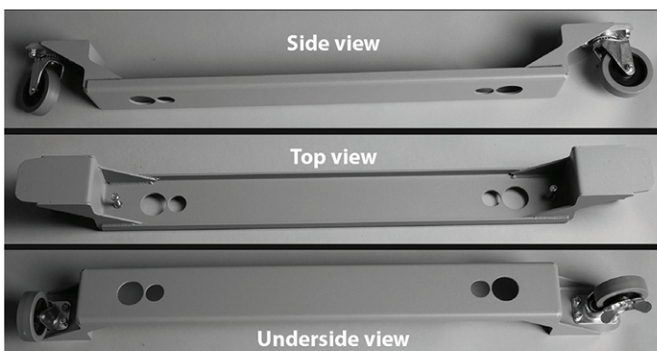

Allows full mobility of Garrett PD-6500i walk-through metal detector by one person. No lifting required. Now you can move the detectors to a secure location when not in use and provide an unimpeded exit at the close of an event.

Extreme stability combined with portability.

Two fixed casters with locking devices provides stable operation of detector. Two swivel casters provide maneuverability and are permanently attached to the base of the walkthrough.

All terrain environment design.

3-inch durable wheels allow movement over any hard surfaces. Durable, power-coated steel allows use in all types of weather.
