SM 100 Wireless Sync Module

Made in the USA

The Garrett SM 100 Wireless Synchronization Module allows multiple Garrett *PD 6500i* walk-through metal detectors to operate in close proximity without the need for power line phase or wired synchronization.

PD 6500i SM 100 wireless sync module
Part No. 1168800
MSRP $149.95

- A leader unit can control a cluster of follower units within approximately 50 feet. This feature is especially important when the units are operated from battery power.
- A cluster consists of one leader unit and as many follower units as space allows.
- Nine radio channels are available to allow the configuration of multiple clusters within a venue.
- For use with the Garrett *PD-6500i* walk-through metal detector.
