Follow the step by step guides to connect your Google Assistant or Amazon Alexa

SAFETY INFORMATION & SPECIFICATIONS

THIS TIMER IS A "GROUNDED" DEVICE

The male plug contains a ground pin and is only intended for use with a three-pronged grounded outlet.

THIS TIMER IS FOR USE WITH A 125VAC POWER SOURCE.

125VAC / 60Hz

DO NOT ATTACH A DEVICE THAT EXCEEDS THE UNIT RATINGS:

**15A / 1875W Resistive
5A Tungsten**

Do not plug heaters or heat producing devices such as coffee makers, toasters, clothes irons, etc. into the SmartOutlets.

LIMITED 1 YEAR WARRANTY

Prime warrants this product to be free from manufacturing defects for a period of one year from the original date of purchase ("warranty period"). This warranty is limited to the repair or replacement of this product only and Prime is not liable for any consequential or incidental damage to other products that may be used with this unit. This warranty is effective only if such unit is returned to Prime not later than thirty (30) days after the expiration of the warranty period. Warranty is void if damage is due to neglect, misuse, alteration, modification, improper installation, or repair by other than Prime. This warranty is in lieu of all other warranties express or implied. Some provinces do not allow limitations on how long an implied warranty lasts or permit the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you.

It is our experience that a product that fails prematurely due to a manufacturing defect in materials or workmanship, will generally do so very early in the product's life cycle, often the first or second time the product is used. Products that are returned for warranty inspection after months or years of continuous reliable service are usually the result of normal wear and tear, which is not considered a defect in materials or workmanship and therefore is not covered by the warranty.

This warranty gives you specific rights, and you may also have other rights which vary from province to province. If unit should prove defective within the warranty period, return within the time period set forth above prepaid with the original purchase receipt to:

FCC REGULATORY STATEMENT

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Notes: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

IC REGULATORY STATEMENT

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

INSTALLATION INSTRUCTIONS:

Install **SmartOutlet** to a vertical flat surface close to a properly installed indoor grounded receptacle

FAQ

- **How do I turn SmartOutlet On/Off if I do not have my smartphone?**
 - Press the button on the side of the **SmartOutlet** for manual On/Off control.
- **The indicator light on the front of the SmartOutlet is not blinking rapidly. How do I make it blink rapidly, so I can connect the device?**
 - Press and hold the button on the side of the **SmartOutlet** for 5 seconds. The indicator light in the button will begin blinking rapidly, and is ready to connect.
- **What if I am unable to connect my SmartOutlet?**
 - Plug in your **SmartOutlet** close to the router. Set up and program your **SmartOutlet**. Once set up is complete you can plug it in anywhere in your home.
- **How do I change from Fahrenheit to Celsius?**
 - Tap profile
 - Tap the profile picture at the top of the profile page
 - Adjust temperature units
- **How do I add a new device?**
 - Confirm device is powered on.
 - Confirm device is waiting for network configuration. (indicator light on device is rapidly blinking)
 - Confirm the device smartphone/tablet, and router are as close to each other as possible.
 - Ensure the networks of the wireless router and smartphone/tablet are unblocked.
 - Confirm the network password is entered correctly.
 - Confirm the wireless router is using a 2.4Ghz Wi-Fi Channel. Ensure the wireless router is broadcasting and the Wi-Fi signal is not hidden.
 - Confirm the wireless router's encryption method is WPA2-PSK and authentication type is AES, or confirm that both are setup as automatic.
 - If router enables MAC address filter, please remove the device from the MAC filter list and ensure the wireless router is allowing devices to be connected.
