UDB10VP - 10 litre*

UDB20VP - 20 litre*

UDB30VP - 30 litre*

VARIABLE OR PRE-SET TEMPERATURE CONTROL

With the mode set to **VARIABLE**, the temperature can be controlled across a wide range via the graduated knob. Variable mode will suit those users who require warm or boiling water for their special application.

Switching the mode selector to **PRE-SET** will fix the temperature at 95 °C, the optimal temperature for most applications involving tea and coffee.

Using pre-set mode offers a fast and easy setup, achieving consistent temperatures every time. Adjustment of the knob in pre-set mode has no effect on the temperature setting of the urn - it remains constant at nominal 95 °C. This prevents continuous boiling and excessive consumption of energy. It also helps safeguard against accidental user adjustment

Variable or pre-set temperature functionality

HANDS-FREE TAP (HF1)

With COVID-19 contact minimisation considerations in mind, Roband has designed an optional accessory (available to purchase separately) to suit our range of Robatherm Hot Water Urns and Percolator.

This enables the operation without the need to touch the dispenser.

SPECIFICATIONS

MODEL	CAPACITY* Cups (160 ml)	POWER Watts	CURRENT Amps	DIMENSIONS dia. x h (mm)
UDB10VP	50	2300	10.0	240 x 480
