

Royston Induction Cooker - CIC3500W

This Royston countertop induction range delivers superior usability and performance for all your cooking needs! Perfect for use in omelet stations, catering services, display cooking, and other cooking

Product description

This Royston countertop induction range delivers superior usability and performance for all your cooking needs! Perfect for use in omelet stations, catering services, display cooking, and other cooking applications, this induction unit is safer than conventional countertop ranges since there's no open flame or exposed burner. And thanks to its innovative technology, this cooker heats up in as little as one minute. The unit features a stainless steel body with Schott glass.
