Combi Cutter

CC-32S

Small machine with potential

HALLDE's Combi Cutter is a perfect compromise for the smaller kitchen. The CC-32S is both a vegetable preparation machine and a vertical cutter in one machine. It's small and compact and easy to put away and take out when you need it.

HALLDE Speed Selector

The CC-32S has two speeds, one high (1,450 rpm) for the vertical cutter and one low (500 rpm) for the vegetable preparation. The machine automatically detects which top is attached and sets the speed to be used.

Developed for the best hygiene

The CC-32S is manufactured solely from hygiene certified material. The machine has smooth surfaces, rounded edges and has no unnecessary recesses where food might penetrate and get stuck. For quick cleaning, all loose parts are simple to remove for easy rinsing of the machine. All loose parts can be washed in the dishwasher.

Only the best material

The machine base and knife chamber are manufactured of ABS-plastic. The feeder is strong polycarbonate and the bowl is stainless steel. Only top quality stainless knife steel is used to manufacture the cutting tools' knife blades.

Highest possible reliability

The powerful motor is geared down and has a high torque, which makes the CC-32S exceptionally reliable – irrespective of the foods you are working with. If the motor is called on to work harder, more power is supplied to ensure even running.

Vegetable cutter

When the pusher plate is folded up the machine stops for filling. When it is folded down the machine restarts and you can continue working. This automatic start and stop function makes your work more effective. A clear advantage, particularly when larger volumes are involved. The feeder has a feed tube for preparing long and narrow items like cucumber and leak.

Double safety against unprotected knife

If the feed cylinder is removed the power is cut. Thanks to this double security there is no risk of the machine starting with an unprotected knife.

Cutting tools for all occasions

Our wide range of large Ø185 mm cutting tools means the CC-32S can handle every conceivable task. It slices, grates/shreds, cuts juliennes and crimping slices – everything from firm to soft products.

Vertical Cutter/Blender

The three litre bowl has a tightly sealing lid that allows for the preparation of larger volumes of both liquid and dry ingredients. The vertical cutter can be run at one speed, 1,450 rpm.

Smart functions

The CC-32S has a patented scraper system with three scraper arms. These keep the lid and the inside of the bowl clean. At the same time they move the ingredients towards the knives during preparation. The design and angle of the knives in combination with the scrapers means that the ingredients are turned in the bowl giving the whole content a uniform texture. This gives perfect results in quick time. The knives are serrated which makes them more wear resistant.
