7. HANDLING AND STORAGE**7.1. Precautions for safe handling:****Technical measures/Precautions:**

Storage and handling precautions applicable to products: Liquid. Irritant even corrosive. Sensitizing. Dangerous for the environment.

Provide appropriate exhaust ventilation at machinery. Provide showers, eye-baths

Safe handling advice:

Remove all sources of ignition. Avoid static electricity build up with connection to earth. In case of insufficient ventilation, wear suitable respiratory equipment. Most acrylic monomers have low viscosities; hence, pouring, material transfer and processing of these materials do not necessitate heating. DO NOT use localized heat sources such as band heaters or steam. Use hot boxes or hot rooms for heating or melting. Do not overheat - this may compromise product quality and/or result in an uncontrolled hazardous polymerization. To facilitate product transfer from original container when the product is viscous liquid/solid, this product may be heated to a maximum of 80C/176F for up to 24 hours.

Hygiene measures:

Take off immediately all contaminated clothing. Prohibit contact with skin and eyes. Wash hands before breaks and at the end of workday. When using do not eat, drink or smoke. Avoid inhalation of vapours. Wash hands after handling. Remove contaminated clothing and protective equipment before entering eating areas.

7.2. Conditions for safe storage, including any incompatibilities:

Keep tightly closed in a dry, cool and well-ventilated place. Store in original container. Protect from frost, heat and sunlight. Keep away from open flames, hot surfaces and sources of ignition. Make sure of the presence of air and inhibitor in the drums. In addition, the product's inhibitor(s) require the presence of dissolved oxygen. An air space is required above the liquid in all containers; avoid storage under an oxygen-free atmosphere. Provide impermeable floor. Provide a catch-tank in a bunded area.
