Finding Free Movies and TV Shows

If You Are Ever Having a Hard Time finding a Movie or Show in Kodi, Instead of Trying Another Kodi Build or Kodi Addon, Try One of Your Movie Apps or 1-Click Movie/TV Show Addons. Why? Kodi Addons Use a Lot of the Same Sources. Also, Websites Are Aware of Kodi and Some Try to Block Them. Why? The Websites that Host the Free Movies, TV Shows, Etc. Lose Money When You Stream the Content Ad-Free Through Kodi Instead of Going to Their Website, Clicking It, and Watching it With Ads. They Are Less Concerned with Other Apps Which Do Not Impact Their Bottom Line as Much as Kodi.

How to Play a Movie or Show in Kodi

Take Advantage of the 1-Click Movies and TV Shows. You Will Find a Shortcut to 1-Click Movies and Shows at the Top of Nearly Playlist for Movies and TV Shows in the Freedom Build. For Example, Click “Popular Shows” or Click “HD Movies” in Your Movies Section, Select 1-Click Movies. Is Every Movie Going to Play? No, If 1 Section or 1 Addon is Not Working Well, Just Click Your Back Button and Scroll Down to the Next Option. We Include Over 20 Different Sources for 1-Click Movies and Shows and There are More In the Playlists We Have Set Up for Documentaries, Classic Films, Stand-Up, Etc.

Want the Most Current and Specific Advice for Streaming?

See Our [Top 10 List](#), for the Best Streaming Advice About the Best Apps and Kodi Addons Today. 1 Quick Word of Advice before You Send Us a Hot and Bothered Email in all Caps Saying, “I CLICKED IT AND NOTHING WORKS”... Please Know that the Quality of Free Streams Can Change in an Hour, Especially When You Are Streaming During Peak Hours. The Only Free Streams that Are Immune to the Crazy Laws of Supply and Demand for Free Movies and TV Shows are “Google Links”. Essentially, These Are Movies that Someone Has Uploaded to a Google Account. They Stream Flawlessly because Google is an Internet Giant and They Have Endless Supplies of Fast Internet and Even Faster Servers to Handle all the Demand for Free Streams, but Google Shuts These Accounts Down All the Time so these Streams Need to Be Replaced by the App and Addon Developers Regularly. The Best Way to Find Google Links for Peak Hours is to Rotate Through Your Apps Looking for the Most Recent App Updates and The Most Dedicated App Developers, or You Can Cheat and Simply Sign-Up for a Paid Real-Debrid Account and Get Exclusive, High Quality Streams that No one Else Can Access for a Small Monthly Fee (\$3-4).

Finding Free Movies and Shows Using Movie “Scraper” Addons in Kodi

These Are the Kodi Addons at the Top of the List in Your “HD Movies”, “New Movies”, “Trending TV Shows” Sections in the Freedom Build.

1. Click any Kodi “Scraper” Addon. For Example, Click “Scrubs”, “Numbers”, Etc.
2. Click the Movie or TV Show Episode You Want to Watch. *Feel Free to Click the Back Button on Your Remote Control or Click “Cancel” to Stop Searching for Streams and Skip to the Results.
3. Click Link #1 at the Top but Pay Close Attention to Which Link Kodi Ends Up Playing. It rarely is Link #1. For Example, Kodi May Test Link #1 and Skip it. Test Link 2 and Decide to Play It.
4. If the Stream Kodi Decides to Play Buffers or Is Not Worth Your Time, Simply, Hold Down the Back Button on Your Remote to Stop the Movie.
5. Scroll Down and Click the Next Untested Stream. For Example, Link# 3 in the Above Example.

Having a Hard Time Finding the Kodi Addons from Our Top 10 List?

- Click Directly on the Word “Movies”. Click on Any Movie You Want and Click “Play” This will Allow You to Select the Addon You Want to Use (See Our “[Top 10 List](#)” for the Best Addon). Select the Addon You Want to Search for the Movie. It will Find You Links and List Them According to Quality. Click the Top Link. Once Again, Pay Attention to the Link It Plays, not just the Link You Clicked. If It Doesn’t Play, Scroll Down and Click the Next Link. For example, If It Skipped Links 1 & 2 and Tried to Play the 3rd Link, You Would Click the 4th Link. Or Simply Try Another App or Addon. **The Quickest Way to Close Out of a Movie or Show taking Too Long. Press the Back Button.** Then Click the Back Button as Usual to Get Back to the Main Menu. or Click the Menu Button and Scroll Left 1x to Click Stop in your Other Build) Otherwise it will Run in the Background and Slow Down the Search Process.
- Movies that Are Still Playing in the Theatre May Not Be Available in HD Quality. You Don’t Have to Settle for Grainy Movies. Most Movies Will Be Available in HD When We Get Close to the Golden Globes and “Oscars”.
- *Rem: If You Get a Pop Up that Tells You to Go to a Website, like www.Olpair.com or www.Vshare.eu You Can Just Go to Your Phone and Type in the Website to Pair Up Your Device. Or Click the Back Button to Continue Searching.*
- **If It Doesn’t Play or Buffers** Click the Back Button, Scroll Up, and Click Any Other Addon at the Top, or Try Your Movie Apps Like the Cinema App.

For TV Shows Make Sure You Are Backed Out to the Main Screen and Scroll to Your Right 1x to “Shows”. Scroll Down and Scroll to the Right. Click Any Addon In Our Top 10 List You Can Find, Scroll Down and Click “Trending” or “People Watching”. Find a Show You Want to Watch. Click it, Click the Season, and Click the Episode.

What to Do If You Get “No Streams Available”? Or Can’t Find an HD Link?

If You Can’t Find the Movie or Show Using Your Apps, Then It’s Probably Not Available Yet on the Internet. This Sometimes Happens Because The Movie Database Companies Are Completely Separate from Kodi and Your Streaming Applications. They Just Update their Databases Whenever New Plot Info, Fanart, Etc. Becomes Available Period. You Really Don’t Know if Anyone Has Found a Copy and Is Streaming It Until You’re Actually Viewing it on Your Screen. Luckily, We Have Created a Pretty Simple Solution to Help You Avoid This Issue. Just Go to the “Latest HD” Section in Your Freedom Build. 90% of the Streams in this Section Come Directly from Our Trakt Account which is Updated Daily with All the Latest HD Movies. More Quick Tips: Scroll Down in the Latest HD Section to Find Out How to Find the Latest HD Releases Using Your Movie Apps for Higher Quality Streams. Pay Attention to the Ratings for the Movies, but Also Pay Attention to the Number of Reviews They Have Received. For Example, If a Movie Has 10 Reviews or Less, There May Not Be Enough Demand for the Movie or It May Not Be Worth Your Time.

Other Issues You May Run Into:

1. The Film is in a Foreign Language, It Has Foreign Subtitles, It’s Missing English Subtitles, Etc. Your Apps and Video Addons Search for Movies All Across the Internet, Just Like You Search for Something on Google. If a Website Has a Movie Matching the Name of the Movie You Are Searching for, Your Apps and Addons Are Going to Find It and Play It. Regardless of Subtitles. There Are No Guarantees About the Quality of the Video or Experience Especially if the Film is Brand-New or Still Playing in the Movie Theatres.
2. The Movie is Just an Advertisement for the Movie, Not the Full-Length Movie. Sometimes Websites Forget to Label Movie Trailers so Your Addons Will Find It and Play It, but It’s Just the 3 Minute Advertisement for the Movie, Not the Full-Length Film. This is the Same Reason Why You Will Find Some Shows Where the Episodes Are In the Wrong Order. If This Happens, Simply Click the Back Button and Try Another Stream Provider, but Sometimes Things Like This Can Fall through the Cracks. Sometimes the Streams are In ABC Order. For Example, Episode 1 will Play, Then Episode 10 will Play Before Episode 2, because It’s Sorted in ABC Order not Numerical Order. If You Catch It, Try to Pull Yourself

Away from the Show and Just Hop Over and Try a Different Movie/ Show and Come Back To It Later.

How to Start Saving Money with Kodi Today.

Our Advice: Most People Pay \$20-30 Per Month for Premium Channels, so This is a Great Way to Start Saving Today. ***Cancel Your Paid Providers and Premium Channels with Your Cable Provider Today. Take that \$20 and Use it To Pay for 6 Months of Real-Debrid Service. (See “Real-Debrid” Below.)***

If Your Cable and Internet Service Are Bundled Together and Your Provider Tries to Use This Against You, Use It Right Back on Them. Tell Them to Transfer You to Whoever Is in Charge of Cancellations (Usually the Retention or Loyalty Department). You Need to Speak with Them Anyways. They Have the Authority to Help You Save Money **Without Putting You into a New Contract. This is Important Because Your Next Goal Is to Get Unbundled. See How Much You Could Be Paying Per Month with the Premium Sources We Recommend Below. Take The Difference and Save it for Your Retirement, Spoil Your Kids, Grand Kids, Etc.**

Live TV/ Sports

New! As of 9/4 We Recommend Using the Online Shortcuts in the Freedom Build or the HD Sports Apps for the Best Results. We Go Over These Sites and Apps in the Videos Below and in the Freedom Build. We Also Recommend PlayersKlub (\$5-8 Per Month) if You Watch a Lot of Live TV and Are Looking to “Cut the Cord”. Open the Freedom Build by Clicking the 1 Icon, Let It Load, Scroll Right 4x, and Click Directly on the Word “Sports Apps”. Then Click “[Online Streaming Websites](#)” or “[HD Sports Apps](#)”. Click [Here](#) for a Walkthrough for SportsHD.Me and All of Our Favorite Streaming Sites. Also, Click [Here](#) for the “HD Challenge” to See the Sport Apps We Are Currently Recommending. Online Websites and HD Apps Have Higher Quality Streams and Are More Stable than Your Kodi Addons. You Can Click “TV Guide” but the Live TV And Sports Streams from Kodi are More Likely to Freeze Up and Buffer Especially During Peak Hours. Free Sources in Kodi are Extremely Popular, and Sometimes They Are Unable to Keep Up with Demand. **

How to Use the TV Guide in Your “Day 1: Freedom Build

1. **Click “TV Guide” in the Live TV Section of Your Freedom Build to Find What Channels Your Favorite Games and Live TV Shows are Playing on in the US, UK, and Canada.**
2. **Click the Menu Button and Use Your Android Apps Like LiveNetTV and Redbox to Play the Channels for the Best Results.**

For Sports, Do Not Just Look for US Channels. Take Advantage of the UK and Canadian Stations (TSN1-5 are Canada’s Version of ESPN). This Will Increase Your Odds of Finding Stable HD Streams. You Can Also Go to liveonsat.com and www.wheresthematch.com on Your Phone/ PC to Help You Find What Channels the Games or Fights Are Playing. **UFC PPV Fights are Usually on BT Sports 1 or 2 and Boxing is on Sky Sports Main Event or Something Similar.** Click “UFC, Boxing, and WWE” in the Sports Section of the Freedom Build to Find a Plan A, B, and C for Boxing. We Cannot Make Any Guarantees for PPV but Test These Sites Out.

What to Do If You Have “Low Storage” Space or Need to Clean Up Your Device? (Also, See Why This Happens in the Next Section Below)

Use the  “Clean Master” (or “DBTV Assistant” if You have an Amazon Fire TV Stick 4K, Cube, or Fire TV 3) . If You Purchased Your Device After 9/26 These Are Already Installed on Your Device. Just Click Clean Master and Allow it to Scan Your Device. When It Finishes, Click “Launch”. If You Have the DBTV Assistant, Click “Optimize” or “Scan” at the Top.

For More Info on Cleaning Your Device, Click the #1 Icon for Your Freedom Build, Scroll Left Approx. 5-6 times to Get to the “Programs” Section. Click “1-Click File Cleaners”. Start at the Top and Work Your Way Down Until You Have Cleaned Up Your Device. Have the Cloud and Don’t Have These Apps? Click the ES File Explorer (or MiXplorer), Click “Low Storage Space” or Click “Slow Performance” and Click the Apps to Install and Open Them.

Also See Our [Top 10 List](#). Quickly Scroll Down and Look for Our “Uninstall Lists” in Red and App Alerts in Orange. Apps that Are in Red Should Be Uninstalled Immediately and Apps in Orange Are Up To You. Orange= Apps That Run in the Background or Are “Data Hogs”. They also Take Up More Storage Space than Most Other Apps. Orange Apps Are Only Recommended if You Use Them Regularly. If You Don’t Use Them Regularly or Have No Use For Them, Get Rid of Them and Speed Up Your Device. For Example, Please Uninstall an Orange Free Live TV App, like Mobdro, if You Have a Paid

Subscription to Gears TV. Click the  “Easy Uninstaller” Application and Checkmark All the Apps At One Time, Scroll Down to the Very Bottom and Click Your Select Button to Get Rid of all of them In One Quick Process.

Have the Cloud? Click the ES File Explorer or MiXplorer, Click “Low Storage Space” or “Slow Performance” for More Info.

Please Do Not Uninstall or Update the Following Apps Unless You Know Exactly What You Are Doing and Why You Are Doing It.

ONMC (1 Icon)

Kodi (Updating Your Kodi Application from Version 17 to 18 May Destroy Your Build if You Do Not Follow Our [Specific Instructions](#))

ES File Explorer

MixPlover

These Are Your Cloud Drives and Your Ultimate Plan B Options if Anything Goes Wrong. This Version of ES is More User-Friendly and Secure (We Block Ads and Fix the Security Vulnerabilities that Come with the Standard ES File Explorer) and It is Setup to Go Directly to Our Cloud Drive.

FileLinked (Update this, but Do Not Delete it) We Use this Application to

Download Updates for the Freedom Build Faster.

Silk Browser. (Do Not Update or Delete) When You Open Silk Browser Click Select “Launch Without Updating”.

Why You Have Low Storage Space (Even If You Have Not Downloaded or Added Anything)

Streaming Devices Are Constantly Downloading, Updating, and Storing files to Get You the Best Performance, and Eventually These Files Start to Add Up. For example, each time you update an application, you end-up with a leftover file that is approx. 1/4th the size of the app and each time you Get a Kodi addon, Kodi build, or system update, you end-up with leftover “Zip” files that are approximately ½ the Size of the Updates. Actually, All Electronic Devices end up with these leftover “Junk” files”. Thumbnails, Artwork, Movie/tv Show Search Results, and Even a Portion of all the movies, shows, Sports You stream are all “cached” or stored on Your Device to Prevent Your Device from Buffering, to Save You From Using too Much Internet, and to Make Sure You Do Not Have to Wait for Them to Download Again the next time You Use Your Device, Most of these Files are Cleaned up By The Applications That Create Them, Your Kodi Builds, or Your Device When You Wait for it to Load, but not all of Them and eventually These Leftover Junk Files Start to Add Up. No worries. Simply click your Clean Master or DVTV App and Click to Scan Your Device. See the notes in the Section Above if you need help.
