[2 Very IMPORTANT Rules for Using Kodi and Streaming Properly.](#)

1. **Wait for Your Kodi Builds to Load.** It Usually Only Takes 1-Minute for Your Day: 1 Freedom and Kodi Build to Load (Most Other Kodi Builds Take 3-5 Minutes), but It Just Depends on How Long It Has Been Since You Used It Last. It Has to Process All the Addon Updates that Have Rolled Through Since Then. Please Do Not Click Anything Until It Finishes Loading. You Will See the Weather Icon and Temperature Pop-Up. And Then Your Build will Process any Addon Updates Available.
2. **Remember to Exit Out of Your Apps and Your Kodi Builds Properly (Do Not Click the Home Button and Leave Your Apps and Kodi Builds Running in the Background.)** In Your Kodi Builds You Simply Hold Down the Back Button on Your Remote Control While You Are on any of the Main Screens in Your Build (like Movies, TV Shows, Sports, Etc.). Then Click “Exit”. Please Wait Up to 1-Minute for Kodi to Close Out. This is When Kodi Saves Everything. In Your Apps, You Just Click the Back Button Until It Asks You if You Want to Exit and Then You Click Exit or it Simply Just Closes Out After Pressing the Back Button 2-3 Times.

If You Cannot Open One of Your Apps or Kodi Builds or It Takes More than 2 Minutes for Your Kodi Builds to Close Out, Double Click Your Home Button. Scroll Left and Find Your Kodi or Day 1: Freedom Build, Scroll Down and Click Dismiss. Click the App Again and See If It Opens. If You Continue to Have Issues, Click Your Home Button and Click the Main Settings for Your Device (in the Bottom Left or Top Right Corner)> Click “Apps”> Click “Kodi18” (for the 1 Icon), Click “Kodi” or Any App You Need to Open> Click “Clear Cache”. **Please Do Not Ever Click “Clear Data”.** This Will Delete Your Build. Click “Open”.

****How to Get the Most Reliable Free HD Streams? Try Your Apps.** We Optimize “Morph TV” and “Cinema” for 1-Click Autoplay. Is Everything Going to Always Work? No, but It’s Much Easier Especially When You Are Just Getting Started. If Autoplay Doesn’t Work, Just Click the Back Button on Your Remote and Click Link #2 or 3. You Can Also, Try Another Movie or Show. You Have a World of Different Apps and Addons to Choose from and Everything is as Easy as It Can Possibly Be. For the Most User-Friendly Setup See “Real-Debrid” and PlayersKlub on Pg. 3 of Our Complete Streaming Guide. You Can Get Both For \$11/ Month.

[How to Download Your Complete Digital Start Guide and More](#)

Very Important! Head Over to Our Website, www.Lmir.us on Your Phone or Computer (the Bigger the Screen, the Better). Click “24/7 Support” at the Very Top or Bottom of the Page. Scroll Down and Click on the NVIDIA Logo to Download and Open Our Complete Streaming Guide. Click on Anything You See on Pg. 3 to Go to the Information You Need. Also, Click the Shortcut to Our “[Top 10 Addons/ Apps](#)” for Everything We’ve Found Recently to Help You and Important News About Your Apps and Addons.

Your App Launchers and Your Official Blue and White Kodi Application

1. Make Sure You Exit Out of Your Day 1 Freedom Build Properly. (Click Here to See the [2 Rules](#)

of Kodi) Click AppStarter to See Every App on Your Entire Device Categorized and Ranked. (Press Your Home Button or to Exit Out of Your App Launchers.) Notice the Green Icons towards the Bottom? Those are Shortcuts to the Best Live TV and Sports Websites. Please Do Not Click These Until You See The Videos Going Over the “Streaming Websites” in the Sports Section of Your Day 1: Freedom Build. You Need to Turn on Your Blokada App and Open Them Using Your Silk Browser for the Best Experience, but We Go Over Everything Inside the Build. Just Click Directly on the Word, “Sports” in the Sports Section and Read the Quick Tips and Watch the 2-3 Minute Videos for the “Streaming Websites” Whenever You Are Looking for Live Sports.

2. Also, Whenever You Are Ready, click  and Feel Free to Follow the Written Walkthrough Below. Once Again, Please Make Sure You Know the “2 Very Important Rules” Above. (These Rules Apply for All of Your Builds. If You Forget to Exit Out Properly and Have 2 or More Builds Open at 1 Time, Your Build Will Freeze Up or Crash and You Will Think Something Is Wrong with Your Device. This is Very Simple and Very Important. Just Make Sure You Close Out of Your Apps and Your Kodi Builds Properly. Do Not Click the Home Button and Leave Them Running in the Background.

If You Are Viewing this on a Phone, Please Rotate Your Screen for the Best Viewing Experience. (For the Best Results, View this on a Larger Screen)

Three Important Things NVIDIA Does Not Mention about Your Remote Control.

1. **Hold Down the Select Button** (Your Main Button) or “Longpress” Things to Pull Up Your Options Menu. (If You Have an NVIDIA Gaming Controller, You Hold Down the Green “A”

Button or Click the Red “X” Button 1 Time) For Example, If You Hold Down the Select Button in Kodi You Can Add Things to Your “Favourites”. If You Hold Down the Select Button on Your Home Screen, You Can Move Around Your Apps. If You Hold Down the Select Button in Cyberflix, It will Play the Movie or TV Show Episode.

2. **Hold Down the Home Button** (the Button with The Circle) to Go to Your Home Screen. This Is How You Get Out of You App Launchers. Click the Back Button to Get Out of the Screen Capture Menu if That Pops Up. You Can Also **Double click the Home Button** to Scroll Through Your Recently Used Apps. Press the Down Button and then Select “Dismiss” to Close Out Your TV Launcher Applications and Return to the Home Screen. You Can Also Dismiss Kodi If It Freezes Up and Force Close Unresponsive Apps by Clicking “Dismiss”.
3. Pay Special Attention **to the Volume Slider on Your Remote and Controller (the Strip in the Center of the Remote from the Mic Button Down)**. You Can Tap on this Strip to Pause and Play the Movie. If You Tap the Volume Slider 3-4 Times it Activates Your Mouse Toggle Click Your Home Button to Deactivate the Mouse Toggle. If this is Your First Time Using

Your Mouse Toggle, Locate Your Mouse Toggle App  and Click [Here](#).

Have an NVIDIA Gaming Remote?

Use Your Right Joystick to Pull Up Your Mouse Toggle in Certain Applications (This Controls the Volume in Kodi) and Pay Special Attention to the **Back, Play, and Home Buttons Facing Up At You at** (Between Your 2 Joysticks). The “X” Button is Your Menu Button. You Can Also Click the Right Joystick to Pull Up Your Options. Click Your Right Joystick If Your TV Guide Freezes Up or Addon Locks Up when You Are Searching For Movies. Then Click “Settings” It Works 80% of the Time.

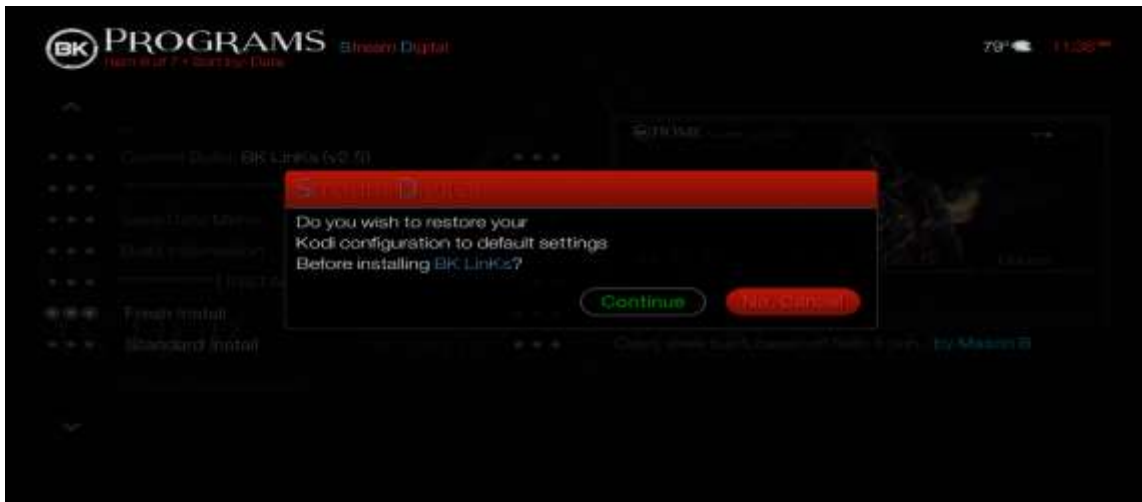

How to Update Your Build

Update Your Build Whenever It Pops Up on Your Screen. Build Updates are Super Simple and Very Important. The Updates Install All the Latest Addons and Delete All the Outdated Addons in Just 3 Clicks. Click [Here](#) for a Quick Video Walkthrough or Continue Reading Below. It Actually Walks You Through What to Click on Step 1, Just Read Your Screen. After That, Just Pay Attention to the Colors. Try Not to Click the Option in Red or It Will Cancel Out the Update.

1. **Click “Fresh Install”** In the Bottom Left Corner. (This Will Look Different but It’s The Same Exact Process.

2. Click "Continue" (Advice. Pay Attention to the Colors, Red is Wrong)

3. Whenever Your Build is Finished Updating, Click "Force Close" (Usually in Green or White.) Reopen Kodi and Wait 2-3 Mins for Your Build to Startup After Updating.

How to Find Our Walkthrough in Your Favourites

- If You Have any Questions About Your Build Read the Details We Leave in Your Favourites.

Scroll Down and Click the Star Icon in the Bottom Left Corner to Get to Your Favorites in Kodi, or in the "Day One: Freedom" Build, Hold the Back Button and Click Favourites from any Main Screen. In SDTV

You Scroll Up 2 Times (2x) and Click the Select Button on Your Remote to Click “Favourites”.

See the Star and Power Icons in the Bottom Left Corner? Click Them to Pull Up Your “Favourites” and Exit Out of Diggz and Cellardoor TV.

How to Play a Movie or Show with Scraper Addons:

See Our [Top 10 List](#), for the Best Kodi Addons for Movies and TV Shows. Just Find One of the Addons On Our List and Find It In Your Movie Section. Click it and Find a Movie You Want to Watch. Click the Movie and Then Click the Link You Want to Play the Movie. **Pay Attention to 1 Thing.** Pay Attention to the # of the Link it Actually Plays on Your Screen. (Not the Link You Clicked) It Doesn't Always Play what You Clicked. It Will Skip it If It's a Bad Link. So, Pay Attention Closely to the Number on Your Screen.

If It Doesn't Play, Scroll Down and Click the Next Link (If it Stopped or Failed to Play Stream #10, Click #11). If it Plays but Its Freezing or Buffering, You Can Either Pause the Video and Wait to See if It Straightens Out, or You Can Click the Back Button to Stop the Video, Scroll Down and Click the Next Link. (Again, If it played link #10, Click #11).

Having a Hard Time Finding Kodi Addons on Our Top 10 List in the Build?

Click Directly on the Word “Movies”. Click on Any Movie You Want and Click “Play” This will Allow You to Select the Addon You Want to Use (See Our “[Top 10 List](#)” for the Best Addon). Select the Addon You Want to Search for the Movie. It will Find You Links and List Them According to Quality. Click the Top Link. Once Again, Pay Attention to the Link It Plays, not just the Link You Clicked. If It Doesn't Play, Scroll Down and Click the 2nd Link. Or Simply Try Another App or Addon. **The Quickest Way to Close Out of a Movie or Show is to Long Press the Back Button.** Then Click the Back Button as Usual to Get Back to the Main Menu.

- Movies that Are Still Playing in the Theatre May Not Be Available in HD Quality. You Don't Have to Settle for Grainy Movies. Most Movies Will Be Available in HD When We Get Close to the Golden Globes and “Oscars”.

- *Rem: If You Get a Pop Up that Tells You to Go to a Website, like www.Olpair.com or www.Vshare.eu You Can Just Go to Your Phone and Type in the Website to Pair Up Your Device. Or Click the Back Button to Continue Searching.*
- **If the Link Doesn't Play or Starts Buffering.** Click the Back Button, Scroll Up, and Click Any Other Link or Try Your Movie Apps. **To Stop the Movie:** Hold Down the Back Button. or Click the Menu Button and Scroll Left 1x to Click Stop in your Other Build) Otherwise it will Run in the Background and Slow Down the Search Process.

For TV Shows Make Sure You Are Backed Out to the Main Screen and Scroll to Your Right 1x to "Shows". Scroll Down and Scroll to the Right. Click Any Addon In Our Top 10 List You Can Find, Scroll Down and Click "Trending" or "People Watching". Find a Show You Want to Watch. Click it, Click the Season, and Click the Episode.

Exit Out of Kodi by Holding Down the Back Button or Scrolling Down and Clicking the Exit Button. Then Click "Exit". Please Wait Up to 1 Min. **This is When Kodi Saves Everything. Failing to Exit Out Properly Is Very Important.** If You Don't Exit Out Properly, Your Build Will Freeze When You Try to Open It. See How to "Clear Cache" **Below to Fix This.**

Movies and TV Shows (Cinema, Cyberflix, Media Box, Etc.)

If You Are Ever Having a Hard Time finding or Playing a Movie or Show in Kodi, Don't Try Another Build, Try Your Apps like Cinema (HD Movies), Cyberflix, and Morph TV (or Whatever App is Currently at the Top of Our Your "Movie Apps" Right Now. How Do You Find Your Apps? Just Look in Each Section of Your Freedom Build for Your Apps. Your Movies Apps are In Your "Movies" Section. Click Directly on the Word "Sports" to Bring Up Your Sports Apps. You Will Find All Your Apps In the "Apps" Section of Your Day 1: Freedom Build. See the Top 10 List to See Which Apps We Currently Recommend for Movies and Shows.

Why Use Your Apps? Websites Are Aware of Kodi and They Try to Block Kodi Addons from Accessing Their Videos because the Traffic from Kodi Makes Their Website Crash. They Also Lose Money from Kodi because They Do Not Get The Money they Make From Ads When You Stream the Movie Ad-Free Via Kodi Instead of Streaming it Directly on Their Site. That is Why You Will See Openload and Other Companies Ask You to go to "Olpair.com" or "Vshare.eu" to Stream the Movie. These Are Legitimate Sites. They Just want you to go to olpair.com or vshare on your phone or computer (it's much easier on computer) so they can get the money for the advertisements that are placed on olpair.com.

How to Update Your Apps? And/ or Get Rid of Ads?

Some Apps Update on Their Own, Other Apps Need to Be Updated Using Your App Markets. Make Sure Your Apps Are Running the Latest Version by Scrolling Left in Your Day 1: Freedom Build. When You Get to the "Apps" Section, Scroll Down and Click "App Markets" Read the Notes in This Section or Continue Reading Below. Disable Your Ad Blockers. Click "Apktime" App

Market, click “Top Apps” or “Entertainment” for Movie and TV Show Apps (Also See the “Live” Section, “Sports”, “Fire TV Devices”, “Android TV”, “Non-English”, and More). Verify the Dates. If the Date on APKTime is More Recent Than the Date That You Purchased Your Device, or the Date You Received the Latest Update, Click “Download” and Install the New App. Want Apps That Are More Likely to Update on Their Own? Download the “Original” Versions of the App (Read More Below). Get an Error Message? (“Parse” or “Parsing” Error?) Click the “Easy Uninstaller” App to Open the Application (the White Trash Can Icon in the App Markets Section), Scroll Down and Then Long press the Application You Are Having an Issue Updating. Click “Uninstall”. If Your Download is Stuck at 0%, Disable Your Ad-Blocker Application. If That Doesn’t Work, [Clear the Data](#) for Your APKTime Application. If it Continues to Fail, It May Not Work for Your Individual Device. Look in the Description above the Word “Download”. Look for a Link to the “Original Version” or Something Similar. Click it in the Description. Click Your “Es File Explorer”, “Always”. Scroll Down and Click “Open File”, to Install It. APKTime Is Known to Go Down for Maintenance See our [“Top 10 List”](#) for More Info.

APKTime Tips and Advice.

Need a Walkthrough? Click on the Videos in Apktime. We Purposely Do Not Create Video Walkthroughs for Apps that Already Have Walkthrough Videos in Apktime, Because the Videos

Are Usually Excellent., If Your Download is Still Stuck at 0% See the LMIR Cloud Drive. Click “App Spotlight” for the Latest New Apps or Just Check Back Again Tomorrow.

No Streams Available? Or Movie Trailers Only?

If You Can’t Find the Movie or Show Using Your Apps and Addons in Kodi, Then It’s Most Likely Not Available Yet on the Internet. Why Does This Happen? The Companies That Update the Movie Databases (IMDB, TMDb, Trakt) Have Nothing to Do With Streaming. They Add New Movies Whenever Information About the Movies Becomes Available. Sometimes Websites Forget to Label a Video as a Trailer so Your Addons Will Find New Trailers that Have Been Falsely Labeled as Movies and Start to Play Them, Just for You to Find Out that It’s a 3 Minute Trailer Not a Movie. Or it’s a Foreign Video, Terrible Quality, Etc. This Happens All the Time Because the Video Addon Just Searches Websites Like Google. If a Website Has a Movie File Labeled the Name of the Movie You Are Searching for It’s Going to Find It but There Are No Guarantees About Quality and Accuracy.

Want to Find the Latest HD Releases?

When You Are in Your Freedom Build’s Movie Section, Scroll Down and to the Right. Click “Top 5 HD Addons”, Click Any of the Playlist for “Latest HD Releases” This will Tell Exactly Which Movies Have Been Found Recently in HD.) They Are All the Same, the Only Difference is the Addon that Searches for Them.

See All Your Apps for Movies. We Have Modified the Settings for Many of Them Just Like We Do for Kodi, but They Can Scan Websites That Actively Block Kodi from Streaming Movies on Its

Website. This Makes Your Movies Apps the Ultimate Plan B App in Your Arsenal for New TV Shows and Movies Right Now (Approximately an 85% Success Rate) So, If You Are Ever Having an Issue Finding Movies or TV Shows in Kodi, Instead of Trying Another Kodi Build, Try Cinema, Bobby, or Tea TV.

How to Start Saving Money with Kodi Today.

Our Advice Only: Most People Pay \$20-30+ Per Month for Premium Channels Alone, so This is a Great Way to Start Saving Today. *Call Your Cable Provider Today to Decrease Your Cable Bill Today. Use \$3 Per Month of that Money to Pay for Real-Debrid Service.* (Read More About [Real-Debrid](#) Below)

If Your Cable and Internet Service is Bundled and Your Provider Tries to Use This Against You, Use It Right Back on Them. Tell Them to Transfer You to Whoever Is in Charge of Cancellations (Usually the Retention or Loyalty Department). You Need to Speak with Them Anyways because They Have the Authority to Help You Save Money **Without Putting You into a New Contract** Because Your Next Goal is to Get Unbundled and Cut the Cord for Good.

How to Save “Favourites” in Kodi

Click on HBO or Showtime. Let the Addon Pull Up the List of Shows, Then Scroll Down and Find “Games of Thrones” or Whatever You Like, **but Instead of Clicking it. Long Press it, By Holding Down the Select Button or Clicking the X Button on the NVIDIA Gaming Controller.** Scroll Down and Click “Add to Favourites”. Whenever You Are Done, Just Keep **Pressing the Back Button Until You Are Right Back at the Main Screen, Then Click Up to Get To Your Favourites.** Click “Favourites” but This Time, Scroll Up and Over to Find Your Favorite Shows. You Can Remove Anything from Your Favourites by Long Pressing it or Clicking the “X” Button on Your Gaming Controller. For Example, If You Don’t Use Adult Addons, Long Press the Favourite at the Bottom of Your List and Click “Remove”

How to “Pair with Free Online Sources”.

Click [Here](#) For A Quick Video. This is Now www.olpair.com. If You Get a Pop Up That Says go to A Website, You Can Go to the Website on Any Device that Is Connected to the Same Network as Your Device. We Use Our PC but You Can Do It from Your Phone too. Type in the Web Address on Chrome, Safari, Internet Explorer, click “I’m a Human” at the Top, and then Scroll Down and Click “Pair. If You Do Not Have Any Options to Do this, You Can Just Wait for the Link to Timeout, You Can Click the Pairing Link in Your Favourites and Use Your Browser Before Playing Movies, or You Can Click the Back Button to Skip These Links When They Pop Up. Our Advice: Get Real Debrid and It Automatically Pairs You Up. This Is Just One of the Perks for Real-Debrid.

Live TV/ Sports

We Recommend Using the Online Shortcuts in the Freedom Build or the HD Sports Apps We Go Over in the Videos Below. We Also Recommend PlayersKlub (\$5-\$8 Per Month) if You Are Looking to “Cut the Cord”. See Our “Streaming Websites” for the Best Free Sports Websites in

the Freedom Build. (Click the Back Button to Exit Your Favourites, and Long press the Back Button from any Main Screen, Click Exit.) Open the Freedom Build, Let It Load, Scroll Right 4x, and Click Directly on the Word "Sports". Click on "Streaming Websites" or "HD Sports Apps". Click [Here](#) for a Walkthrough for SportsHD.Me and All of Our Favorite Streaming Sites. Also, Click [Here](#) for the "HD Challenge" And See the Sport Apps We Are Recommending. The Online Websites and HD Apps Have Higher Quality Streams and Are More Stable than Your Kodi Addons. Click "TV Guide" but the Live TV And Sports Streams from Kodi May Buffer During Peak Hours. Free Sources in Kodi are Extremely Popular, and Sometimes They Are Unable to Keep Up with Demand. **

We Installed Shortcuts to Streaming Apps in the TV Guide in the Freedom Build (#1 Icon) to Make It Much Easier for You to Find Live TV and Sports. Do Not Just Look for US Channels. Take Advantage of the UK and Canadian Stations (TSN1-5 are Canada's Version of ESPN). This Will Increase Your Odds of Finding Stable HD Streams. Here is How to Maximize Your Chances for Free HD in the Day 1 Freedom Build. Use the Online Shortcuts or Use Your Live TV Guide to Find What Channels Your Favorite Games and Live TV Shows in the US, UK, and Canada. Click the Menu Button and Use Your Android Apps Like LiveNetTV and Redbox to Play the Channels.

For Sports, You Can Also Save liveonsat.com and www.wheresthematch.com as Favorites on Your Phone/ PC to Help You Find All These Channels. **UFC PPV Fights are Usually on BT Sports 2.** Click "UFC, Boxing, and WWE" in the Sports Section of the Freedom Build. We Cannot Make Any Guarantees, but These Are the Best Free Websites Available for Sports and PPV. If We Find Anything New It Will Be Listed in the Notes Above or Below the Top 10 List.

See How to Get to the Adult Addons at the Bottom of Your Favorites in Your Kodi Build. You Just Click it and Enter the Pin# 69 or Long Press it and Select Remove if You Don't Want Adult Content. Ok, Now Let's Exit Favourites by Clicking the Back Button and Scroll Right to the Movies Section. To Skip the Next Section About Paid Providers and Jump to How to Play Free Movies Click [Here](#).

The Best Paid Providers

Please Reach Out to Us Immediately After Your Purchase and We Will Install the 4K Freedom Build which is Optimized for Paid Services like Real-Debrid (Read More Below). We Will Also Install the Latest Apps and Addons for these Paid Providers, Optimize the Settings, and Enable Them, so You Do Not Have to Manually Program Anything. You Just Have to Sign Up for the Service and Sign Into Your Apps and Addons.

We Do Not Profit 1 Penny from any of These Services. There Are No Affiliate Codes in the Links We Post Below. Why? We Want You to Know that the Advice We Give You is Legitimate and Unbiased. We Only Mention These Providers Because It Took Us Years of Testing Out Paid Providers to Find Them and We Could Not Imagine Streaming Without Them.

What is Real-Debrid?

Real-Debrid Is an Amazing Way to Improve the Quality of Your Movies and TV Shows. This is Our Favorite Paid Service. They Use Their 40 Servers to Send You Higher Quality HD Streams. Streams That Are More Secure and More Reliable in Kodi and Your Movie and TV Show Apps, like Cinema, Cyberflix, Etc. On Average, Real-Debrid Users Can Find New Episodes of Walking Dead, Homeland, Billions, etc. in **1080p less than 1 hour After They Air**. That is Faster Than Anyone Else Can Find Their Favorite Shows in 720p and That Is just 1 Perk. (Read Below) Want The Most Reliable 4K Experience? Get Our Nvidia Shield Devices Setup With Our 4K Freedom Debrid Build. Reach Out to Us Before You Purchase Your Device and We Will Pair Up the Addons to Real-Debrid For You. You Just Pair Your Builds to Your Account. (2 Clicks Per Build, See this In Your Favourites.)

How Much Does Real-Debrid Cost?

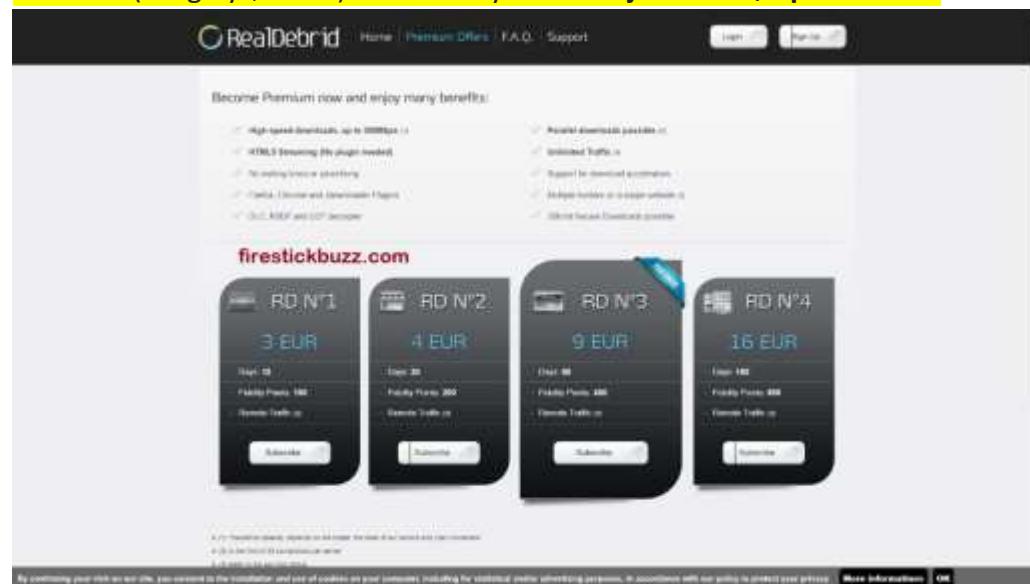

Real Debrid offers 4 price plans. Our Favorite is \$18 for 6 Months of Service.

3 Euros (roughly \$3.50) for 15 Days

4 Euros (roughly \$4.50) for 30 Days

9 Euros (roughly \$10.25) for 90 Days (*featured plan on Real Debrid website*)

16 Euros (roughly \$18.25) for 180 Days. That is just over \$3 per month.

Real Debrid offers multiple payment methods including Credit Card, Amazon Pay, Bitcoin, PayPal etc.

Perks for Real-Debrid Users

1. Real-Debrid Has 40 Servers to Send You Much More Reliable Streams for Movies and TV Shows. Real-Debrid Streams are Much Less Likely to Buffer or Time Out.

2. The Best Chance of Finding Higher Quality Shows and Movies in 1080p or a Higher Quality Resolution.

3. You Don't have to Go to Olpair.com to Prove You Are a Human When You Get Openload Links That Are from Real-Debrid. (We Would Pay \$3 Per Month for This One Feature Alone)

4. Early access to Movies, TV Shows, and UFC PPV Replays.
5. Exclusive Access to Special Sections in Your Addons.
6. You Don't Have to Worry About Privacy with Real-Debrid Links. The Streams Come Directly from Real-Debrid's Servers, so Nobody Can See Anything You Are Streaming.
7. Pair Up Multiple Devices. You Can Pair Real-Debrid to 3 Devices If You Want. As Long as They Are All Connected to Your Network You Are Paying \$3 Per Month.

How to Sign Up for Real Debrid (For More Details, Scroll Down Below)

1. Grab your Phone or Laptop and Go to www.Real-Debrid.com
- 2.. Click Sign Up.
3. Enter a Username, Password, and Confirm Your Password. Write This Down.
4. Open Your Email Account. Find the Email From Real-Debrid and Click the Link to Verify Your Account.
5. Click "Premium" in the Top Right Corner on Real-Debrid.com
6. Select One of the Options. See the Conversion Ratio for Euros At the Bottom of their Page. (For Example, if it Says 1.12. It would Be 16 Euros x 1.12 or \$17.92 for the 180 Day Plan. It Was \$19.08 on 5-12-18.)
7. Pay with Amazon Checkout. The First Time You Try to Pay for Real-Debrid, If it Gets Blocked, Just Make Sure You "Ok" It with Your Credit Card Company and Ask them to Process It Again.

Click [Here](#) for a Walkthrough on How to Pair Up Your Build to Your Real-Debrid Account and How to "Enable Debrid" in Your Addons.

Best Live TV, Sports, and PPV Provider.

Paid IPTV is Not 100% Reliable, but It is 5x More Reliable than the Free Kodi Addons Because They Have Money For Servers and Only Paying Customers Can Access These Servers. **For the Best Value, We Recommend PlayersKlub. For the Highest Quality, We Recommend Gears TV. They Both Have Premium Channels (like HBO, Showtime, Stars, Etc.) Sports Passes and Live PPV. Gears TV Just Has More Servers, So Their Channels Are More Reliable and They Have More Channels in 1080p**

PlayersKlub Is \$8 Per Month, For More Info About PlayersKlub Click Here:

<https://twitter.com/playersklub> or to Sign up, click here> <https://www.mintpanel.co/portal/cart.php>
) Otherwise, Click Here: <https://mintpanel.co/>. Need More Info to Sign up for Playersklub? Click [Here](#).

Gears TV is \$15 Per Month or \$19 with the Mayfair Guide Pro (a Built-In TV Guide). You Can YouTube "Gears TV" for More Info. They Are Extremely Well Known. Click Here: <https://airwild.org/register.php> to Register.

How to Sign Up and Pay for PlayersKlub or Gears TV

It's the Same Process You Go Through When You Purchase Anything Online. You will Click on the Sites Above and Enter Your Info to Register, Just Like You Would Sign Up for Amazon or Any Site. Then You Will Click to View the Services and Products They Offer and Add the Service to Your Cart. The Only Thing Different is That You Will Be Prompted to Create Another Username and Password When You

Checkout or You Will Need to Sign Into Your Account to Get Your Username after You Pay. This is the Username You Will Use to Sign Into PlayersKlub or Gears TV on Your Device. We Recommend That You Make the Password Something Short and Simple and Write It Down.

How to Install and Sign In to the Latest “TPK Player” and “Gears TV” Apps

You Will Find These Applications in the “Paid Live TV” Section of the “LMIR Cloud” Drive. How do You Get to the “LMIR Cloud”?

Option 1: Click Your Blue “ES file Explorer” Application. We Have this Programmed to Take You Directly to Our Cloud Drive.

Option 2: Click the 1 Icon for the Day 1: Freedom Build, (Wait 1 Min. for Your Build to Load.) Scroll Left Approx. 5 times Until You Get to the “LMIR” Section, Scroll Down and Click “LMIR Cloud”.

1. Click “Paid Live TV Apps”
2. Click “Gears TV Launcher” (if You Paid \$15), “Mayfair Guide Pro” (if You Paid \$19), or the “TPK Player” Application.
3. Click “Install” Twice to Install the Application.
4. Then Click “Open” to Open Your Application.
5. Click “Update” to Update the App if Necessary and Sign In with Your Username and Password.
6. If You Get a Message Saying Your Gears TV App is Outdated, Download the “Gears TV Launcher” App and Uninstall Your Current “Gears TV” App. When You Open the “Gears TV Launcher” App, You Will Click the Icon on the Left, and It Will Install the Latest Version of the Gears TV App.
7. **From Now on You Will Find these Apps in the Sports and Live TV Sections of Your Day 1 Freedom Build.** Open Your Day 1: Freedom Build, Scroll to the Right Approx. 4x Scroll Down and Click “Premium Solutions”, and Click the TPK Player”, “Gears TV App”, or “Mayfair Pro”.

Maintaining and Troubleshooting Kodi

If You Ever Click on Kodi and the Screen Is Black or it Freezes Up, You Need to “Clear Cache”.

Be Careful In this Menu! Please Do Not Ever Click “Clear Data.” It Will Delete Out Your Build.

Click the Home Button, Scroll Down and Click Your TV Launcher Pro 2 App.

Click Kodi, Then Scroll Over to Kodi or the Build that is Not Opening and Long press the Select Button on Your Remote Control. Click “App Settings”.

Click “Force Stop” and Then Click “Clear Cache” **Click “OK” or “Yes” if It Prompts You to Confirm Your Selection. (Please Do Not Click “Clear Data” or Uninstall. This Will Delete Out Your Kodi Build**> Now Click “Launch” If This Does Not Work, Continue Reading Below.

Troubleshooting Your Device

We Go Over Everything You Need to Do to Get Your Apps Back on Your Home Screen and How to Update and Enable them to Update and Run Properly. As of 4/2019, We Do Not Recommend Updating to the Latest "NVIDIA Shield Experience". We Will Release a Walkthrough Video as Soon as We Find Any Tangible Benefits That Are Worth the Extra Time and Effort.

For Issues Playing Movies, Shows, Sports, or Live TV in Kodi or Day 1: Freedom Build. Simply Exit Out of Kodi and Freedom by Holding Down Your Back Button and Clicking "Exit".

Try Your Apps (Cyberflix, Cinema, Bee TV, or Morph TV Are Excellent for TV Shows/ Movies) See Our [Top 10 Web Page](#), We Update This Weekly with the Top 10 Addons/Apps We Recommend. Make Sure You Click "Update" Whenever You Receive an Update in Any of Your Entertainment Apps. IF It Fails, Update it Using Your App Markets of the "Requests" Folder in the LMIR Cloud.

Try YouTube. If No Videos Are Playing on YouTube. You Need to Restart Your Device and Try Again. YouTube has a 100% Playback Rate.

Turn Off Your Adblockers. Click "Movie Apps" in the "Movies" Section of Your Day 1: Freedom Build. Click the top Line and Do the Opposite of the Instructions to Turn Off or Disable Your Adblockers. If You Click an Adblocker and It Does Not Do Anything, it is Most Likely Not Installed on Your Device. Simply, Scroll Down and Click the Next Adblocker and Keep Clicking Until They Are All Disabled. (We Install Different Ad Blockers Depending on Whatever is Working the Best for Your Device at the Current Time.)

Restart Your Device.

Restart Your Modem and Router. If this Does Not Work, Click [Here](#) to [Restart Your Router](#). If This Doesn't Work, Call Your Internet Provider and Tell Them, "I Need a Hard Reset on Your End."

What to Do If You Get "Low Storage Error" or Need to Delete Apps?

Use the  "Clean Master" and  "Easy Uninstaller" Applications to Free Up Space. If You Purchased Your Device After 9/26 These Are Already Installed on Your Device. Just Click "Clean Master" and Allow it to Clean Your Device. Click "Launch" When It's Done. For More Info on Cleaning Your Device, Click the #1 Icon for Your Freedom Build, Scroll Left Approx. 5-6 times to Get to the "Programs" Section. Click "1-Click File Cleaners". Start at the Top and Work Your Way Down Until You Have Cleaned Up Your Device. **Please Do Not Delete or Update the Following Apps Unless You Know Exactly What You Are Doing and Why You Are Doing It.**

 **Kodi**,  **CDTV**,  **ONMC** (the #1 Icon),  **SDMC**. These Are Your 4 Optimized Kodi Builds. If You Have Tried All of Your Builds and Do Not Like 1 of these Builds. Feel Free to Explore it One Last Time and Then Uninstall It. Updating Your Kodi Application from Version 17 to 18 May Destroy Your Build if You Do Not Follow Our [Specific Instructions](#).

 **ES File Explorer**  **MixPlover** These Are Your Cloud Drives and Your Ultimate Plan B Options if Anything Goes Wrong. This Version of ES is More User-Friendly and Secure (We Block

Ads and Fix the Security Vulnerabilities that Come with the Standard ES File Explorer) and It is Setup to Go Directly to Our Cloud Drive.

FileLinked (Update this, but Do Not Delete it) We Use this Application to Download Updates for the Freedom Build Faster.

Silk Browser. (Do Not Update or Delete) This is the Best Version for Blocking Pop-Up Ads for Streaming Sports Online and the Only Version that Allows You to Download Apps.

Expandable Storage, Flash Drives, Etc.

****Before Getting Started**, Please Know That We Are Not Responsible if Anything Happens When Transferring Over to a Flash Drive** The List of NVIDIA Shield Approved Storage Devices Changes Daily and We do Not Have Any Control over This List or the Devices NVIDIA Approves. Please do a Google Search for "NVIDIA Shield TV Approved Flash Drives" or Click [here](#) for the phone number and direct link to chat with Nvidia to Make Sure the Device You Are Purchasing is Approved Today. Always Make Sure You Are Purchasing Your Flash Drive or Storage From Reputable Sources. ** Please Do Not Update Your NVIDIA Shield System Software Period If You Are Using External Storage. It Will Most Likely Erase Everything. If You 100% Have to Update System Software, Know What You Are Getting Into and Transfer Everything You Want to Keep Back to Your NVIDIA Shield Internal Storage Before You Update. As of 11-25, Click [Here](#) for the Flash Drive We Are Currently Using if You are Looking to Expand Your Storage. App Summary List

Please See the [“Top 10 List”](#) for the Most Current Info Available about Your Apps and Addons. This List Does Not Include All the Apps on Your Device (And Some of the Apps Below May Not Be on Your Device. We Find All the Best Free Live TV and Sports Apps That No one Knows About So You Will Not Find These Apps Here Unless They Have Something We Need to Discuss with You.

DO NOT Update the Kodi App Using the 3rd Party App Markets Listed Below. This Will Be at the Top of Our Tips Page and In Our Cloud Drive Whenever Kodi 18 is Ready for Prime Time. Nvidia Shield Owners: Do Not Enable “Auto Updates” in the Google Play Store. It will erase the coding and Kodi will start up like a brand new, blank application. **We have setup Kodi to Automatically clean itself, but you are responsible for what you download outside of Kodi.**

Do Not Delete Kodi or ONMC. These Are Your 2 Customized Kodi Builds. Do Not Delete the “ES File Explorer”. This is Our Cloud Drive. and Do Not Delete “Easy Kodi”. This Is Your Kodi Backup and Plan B, C, & D Builds. (Lol, Yes, We Take This That Seriously!)

Everything You Need to Know About Updates

System Updates: These Are Your “NVIDIA Shield Experience” Updates. This is Our Advice Only: Please Stay Away from the Latest System Updates Unless You Know Exactly What You Are Doing and More Importantly, Why You Are Doing it. We Have Yet to Hear a Good Thing from a Customer Who Updated Their NVIDIA from This Version to the Current Version of Oreo. Also, Please **Do Not Update If You Are Using a Flash Drive. There is a Chance That You Will Lose Everything.** If You Have to Update, Make Sure You Transfer Everything You Want to Keep Back onto Your NVIDIA Shield Internal Storage Before You Update. IF You **Accidentally Update to Oreo,** Click [Here](#) and See the Notes Below. The Notes Are More Important Than the Video. Your Device is Running Standard NVIDIA Software. It is Not Rooted. Please Know that We Do Not Have Any Authority or Control Over the Timing, the Quality, the Compatibility etc., of NVIDIA System Updates. If You Have Any Questions Concerning NVIDIA Shield TV Updates, Please [Contact NVIDIA Directly](#)

Build Updates: These Will Pop up on Your screen When You Open Your Kodi, CDMC, or SDMC Builds. Click “Fresh Install” or “Clean Install” (See More Details [Here](#).) We Recommend That You Always Update Your Elite Builds ASAP. Our Day 1: Freedom Build is the Exception to This Rule. It is Designed to Be Updated As Needed. Click [Here](#) to See Our Latest Walkthrough Videos to Update, Restore, or Upgrade our Day 1: Freedom Build. Click [Here](#) for the Latest Video Walkthroughs to Update or Restore Your Kodi Builds.

App Updates: Usually You Just Click Update and Click Install, but if You Have Any Issues Updating You Can Update Your Apps with Your App Markets. Click the “App Markets” in Our Freedom Build for the Latest Tips and Tools to Update Your Apps. Click the Apktime App Market or the Cloud Drive to Download the Latest Version. Please See the List of Apps You Do Not Want to Update. For

Example, You Do Not Want to Update Your Official Kodi Application (the Blue and white “K” Icon). If You Update from Kodi 17.6 to Kodi 18, You Will Lose Your Build. You also Do Not Want to Update your Blue and White "ES File Explorer" Application.

1. Movies /TV Show Apps

The Best Way to Learn About Your Apps? Open Your Day 1: Freedom Build, Scroll Left Until You Get to “APPS”, Scroll Down and Click “LMIR Tips”

Cinema, Cyberflix, & Tea TV: Amazing Video Streaming Apps 10x better than Netflix, with an extremely user-friendly interface. **Top Left Corner:** You can select either TV Shows or Movies. **How to Play the Movies and Shows:** Click on any show or movie you want. For TV: Scroll Down to select the Season. Then Scroll Down and Select the Episode. Scroll Down 1x and Press Play. Then select the stream provider and quality (the top choice is usually the best). Select “Play”. You Can Sign into Real-Debrid in the Settings. **Please Don’t Delete MX Player (Pro) it is required to play Tea TV, Redbox TV, Live NetTV, etc.**

DO Not DOWNLOAD Anything Using Your Apps. Downloading Leads to Viruses and Letters from Your Internet Provider.

1. Kodi Builds

the #1 Icon = Day 1: Freedom. We Designed the Day 1 Freedom Build Based on Nearly 6 Years of Requests. It is Designed to Be the Most User-Friendly Build Ever by Answering the Most Common Questions We Receive About Streaming from New Customers on Day 1. It Currently Can Do Over 20 Things that No Other Build Can Do. For Example, it has a DVR Section that Automatically Scans for All Your favorite TV Shows at the Beginning of Each Day. Click [Here](#) for More Walkthrough Tips and Tricks or Just Scroll Left and Click on Your Favourites. We Gather Up Over 600 Standup Comedy Performances and 1000 Concerts Waiting for You in 1 Folder. Also, You Decide if “Freedom” Is 100% Family Friendly or if it Includes a Fully Dedicated Adult Section.

To Enable or Disable the Adult Section:

Do Not Forget, You Can Also Enjoy Adult Entertainment in the Blue and White Kodi Application. Just Open Kodi. Click the Word “Adult” in the “Favorites” Section and Enter the Pin 69.

For a Video Walkthrough to Lock, Hide, or Remove the Adult Section in the Freedom Build (#1 Icon), Click [Here](#) or Follow the Instructions Below for the Most Current Information.

1. Click the #1 Icon to Open Freedom. Wait 1 Minute for the Build to Load
2. Scroll Left Approximately 6 times to Get to the “System” Screen.
3. Scroll Down and Click “Skin Settings.”
4. Scroll Right and Click “Setup the Aeon Nox Main Menu”
5. Scroll to the Left 1x and Scroll Down.
6. When You Get to the Word “Adult”, Scroll Right 1x and Down to Checkmark “Disable” the Adult Section (or Uncheck It to Enable it.)

How to Use the Pin Lock, Hidden Adult Section

Scroll Left Approx. 5-6 Times. When You Get to the "LMIR" Section, Click Directly on the Word "LMIR" the Pin # is 69. If You Are Ok with the Pin #, just Remove the Adult Section by Following the Instructions Above. You Can Also Change the Pin # for the Hidden Adult Section If You Are Not Happy it.

1. Click Where it Says, "Click Here if You Need Help Locking, Removing. Etc." Inside the LMIR Hidden Adult Section.
2. Click Where it Says, "To Pin Lock the Adult Section, Click Here" or Something Similar.
3. Scroll down to "Metalliq" and Click the Menu Button on Your Remote or Hold Down the Select Button.
4. Click "Edit Super Folder"
5. Click "Lock Folder"
6. Enter Your Pin#. We Recommend You Make It Something Simple and Write Down Your Pin #.

Kodi= Chef Kodi's "Xenon" Build. We Love the Layout of this Build and the Playlists in the Favorites Section for Classics, Urban, Westerns, Documentaries, Etc. Are Never Ending.

The Pin # for the Adult Section is 69. The Sports and Live TV Sections Are Excellent too. It is Safe to Update All Your Builds Whenever You Get the Pop-Up Message to Update on Your Screen. Click "Fresh Install"> "Continue"> It Will Automatically Close Out When It's Done. Just Click Kodi and Wait 5 Mins Before You Click Anything.

SDMC= Stream Digital's "Duffman Reloaded" Build. You Will Get a Pop-Up Message Whenever You Have a Build Update. You Can Also try One of the Other Builds. Your Other Builds May Look Different, but 95% of the Information We Have Discussed Still Applies, with 1 Noteworthy Exception. You Have to Copy and Paste the Updates for ONMC Build Below from Our Cloud Drive. This is by Design. We do not like to have all our Eggs in 1 Basket.

CDMC= CellardoorTV. Explore and have Fun. Your Exit button and Favorites Are in the Bottom Left Corner. **It's Very Hard to Be Specific About Anything Because Builds Constantly Change Out Addons and Entire Sections Come and Go. Builds and Build Developers Come and Go Too.** See Your Whitelist in Your Favourites. If you Grow Fond of One of the Addons, Make Sure You Click It and Add It Here (Otherwise it will Be Gone Before You Know it).

How to Explore New Builds.

We Only Recommend Exploring if You Have Tested and Learned Everything Your Build Has to Offer You. The Main Goal is to Get Comfortable with a Build and Learn Exactly Where to Go and What to Click to Get Everything You Need. Hopping from Build to Build Before You Learn is Counter Productive. See Our [Builds Playlist](#) for the Latest Video Walkthroughs.

If You Are New to LMIR, You Are Most Likely Running the "Xenon" Build with Kodi 18. If You Want to Try Something Different, Click [Here](#) to See the New Interface for "RedBolt" by Chef

Kodi. It's One of the Lightest and Most Straightforward Kodi Builds Available. If You Want to Test it Out, Click [Here](#) to Switch Over.

New Improvements in RedboltV2: The Adult Section Has a Pin# (It is the same pin you always enter). New movie playlists from addons like Venom and Most of the Dead Links from the Recent Kodi Addon Shutdown have been Cleaned. It's 100% Cleaner than the Latest Version of Xenon. (If You Haven't Done So Already, Get the Latest [Quick Update](#) for Your Day 1 Freedom Build If You Want the Cleanest Kodi Experience Right Now) Feel Free to Skip the Walkthrough Video. This is as Simple as It Gets; 5 Clicks.

1. Click "The Chef Leia Wizard" (in the "Xenon" Section)
2. Click "Chef Kodi Builds"
3. "RedBolt"
4. "Fresh Install"
5. "Continue".

Want to Change Out Your Stream Digital Build? (Black Icon that Says, "SDMC")

1. **Go to the Favourites Menu.** Look for the Favourites in the Top Left Corner. **Other Places the Favourites Can Be:** Look for a Star Icon in the Bottom Left Corner or a Section of the Build Named "Favourites". You Can Also Try Holding Down the Back Button to See if It is in the Power Menu. When You Find "Favourites", Click it.
2. Click Wherever You See Stream Digital "Builds" At the Very Bottom of Your Kodi Favorites. Stream Digital Has 10+ Different Kodi 18 Builds to Choose from and It's the Same Simple Steps You Do When You Update +1 Step.

1. Click Wherever You See "Builds"
2. Find the Build You Want to Test; Just Make Sure it is a Kodi 18 Build and Click It
If You Are New to LMIR, You Are Most Likely Using Stream Digitals, "Duffman Reloaded", a Bright, Futuristic Build that is Very Light. For a More Classic Modern Build We Recommend BK Knox if Its Available.
3. Click "Fresh Install" and Click "Continue", (Put Down Your Remote Somewhere Safe)
4. When It's Done It Will Close Kodi, If Not Click "Force Close". Now Just Click SDMC Again to Open it Up and **Allow 3 Minutes for the Build to Finish Installing.**

The Longer Method Using Plan B Builds.

- a. If You Are Not Satisfied, You Can Pick One of Your Plan B, C, D Builds. We Recommend YouTubing These First. This Will Save You Some Time. For Example, One Nation Alone Has Over 50 Kodi Builds. You Want to Find the Most Current Build That Receives the Most Constant Updates.
- b. If You Want to Hop to a Plan B, C, Etc. Click on It in Your Favourites and See if It Asks You to Install the "... Wizard" or "Portal" If it Does, Skip to "C" Below. If Not Click the Repo for the Builds You Want to Try. Click Program Addons, Click the Wizard (One Nation's Is Called One Nation "Portal", Click "Install"

- c. You Will Get a Checklist That Pops Up and Asks You What You Want to Save. If You Have a Paid Provider Click **“Save Login Info”** and **“Save Real Debrid”**. Always Click **“Save Favourites”**, **“Save Whitelist”** and **“Save Sources”** Scroll Down and Click **“Continue”**.

Whitelist: Click these Addons to Take the Optimized Settings and the Most Important Addons with You from Build to Build.

- a. URL Resolver (Starting at the Very Bottom, Scroll Up and Over to Get to the Bottom)

- Wait for It to Clear Everything Off, Download, and Extract.
- Select “Force Close”, Restart Kodi, and Let It Load 3 Mins. You May Have to Restart the Build Twice to Push It Through Depending on the Size of the Build.

3. Live TV and 4. Sports Applications

: Our Favorite Sports Apps. Again, Don't Just Look for ESPN and Fox. BT and Sky are the Premium Channels in England. They Have Movies Like HBO, Sports, and Free PPV. BT Sport 2 = Free UFC PPV Fights. For NBA Games Check TBS and TNT in the Entertainment or US Sections.

Haystack = Our Favorite News Source. Targeted News & Late-Night Shows. It is Ok to Update. Personalize This by Scrolling Down to Settings and Telling It Your Likes

5. App Markets, Our Cloud Drive, and Remote-Control Apps:

ES File Manager= Our Cloud Drive: Do Not Update. Open ES and Check Out Our App Market. This Includes Apps and New Kodi Builds. Also, See Our Documents and See

the "Restore Kodi" Folder if You Delete Your Kodi App, Click [Here](#) . If You Reset Your Box. Open Your ES File Explorer and Click [Here](#) The Docs Pull Up on Your TV and You can Click the Links on the Page to See Video Walkthroughs. Don't Forget to Subscribe to Our YouTube Channel.

APKTime: The Best App Market Available. Adult=6969 (The Adult Apps Do Not Work Well on Your Device. They were Designed for Touchscreen Devices (Phones/Tablets) **Need Games, Download Happy Chick and More.**

Aptoid TV: It is OK to Update and is Extremely User Friendly! If Your Apps Need Updates this is Your 1st Choice if It Asks You to Update. Just Do Not Update the Kodi Application. This will Destroy Your Build

Hard-Coded App Shortcuts for **the Best Streaming Websites:** So, You Don't Have to Remember or Type Anything. We Go Over These Websites in Your Freedom Build and Your Favorites in Your Kodi Builds. They Are Also Scattered Throughout Your Freedom Build. For Example, Click on the **Gary3d Shortcut** and it will take you to

<http://gary3dfxtech.net/> click "Apk" for the Apps and Feel Free to [YouTube Gary's Apps](#).

6. Tools and Utilities:

Easy Kodi: Having Issues with Your Kodi Build? Already Cleared Cache (See Above) Have You Tried Updating Your Build? (See Above) Ok, Then Let's **Open "Easy Kodi". Scroll to the Top and Click "Restore", "Local SD Card"> Click the Backup File You Want to Restore.** Then Click Restore> Open Kodi when You Are Done and See the Section Above About What to Do if the Update Doesn't Work or If You Have to Back out of the Update. If this Doesn't Work, We Recommend You See the "Restore Kodi" Folder in Our Cloud for Directions to Restore Your Build. There Are Also Backups in Here to Try Other Builds. These Will Delete Your Build. Only Use This If You Have YouTubed the Builds and Know How to Use a Wizard to Load a New Build. IN Short See Our Cloud Drive. We Go Over the Steps. It's Very Simple. For the Best Result, We Recommend Creating a Backup Every Month.

Task Manager and More to Close the Apps Running in Your Background. Android TV Software Never Closes out Your Apps. This is a Good Start if you Notice Your Box is Lagging.

AppStarter: Get to Your Apps More Quickly. Click the Home Button On Your Remote to Exit.

****Mouse Toggle: DO NOT DELETE!** This turns your Remote into a Mouse, so you can use Regular Android apps on your TV. Slide Your Thumb from the Top of the Volume Bar to the Bottom and Back Up in One Motion on Your Handheld Remote. Hold Down Your Navigation Buttons to Push the Mouse Cursor It Across the Screen. Click the Home Button 1x to Turn It Off. Mouse Toggle Not Working? The Information We Need to Help You*

1. Name on the Order and An Email Address
2. The App, Build, and Addon You Are Using. (Please Be Specific, There Are Over 200 Sources on Your Device)**
3. What You Are Trying to Play or Watch? (The Name of the Movie, Sporting Event, Etc.),
4. The Error Message or Issue You Are Experiencing? (If Possible, Send Us a Picture Message)
5. Email: LMIRNow@Gmail.com Voice Message: [251-298-7465](tel:251-298-7465)

Thank You!

*On Average, Messages that Do Not Include the Information Above Take 8-10 Hours Longer to Receive a Resolution. Why so Much Longer? Instead of Researching and Resolving the Issue, We Have to Reach Out to You for Further Information, Wait for You to Respond, Then You Have to Wait for Us to Read Your Message, and This Process Tends to Repeat Itself without Any Relevant

Information Being Exchanged. Please Skip this Unnecessary Step and Send Us the Answers to These Questions from the Start. Thanks Again.

**** Everything on Your Device is Organized and Clearly Labeled. Please Tell Us the Name(s) of the Application(s) or Addon(s) You Are Clicking Inside or Outside of Your Builds, **Not Just the Name of the Build**. Our Kodi Build is Filled with 100's of Applications, Websites, and Addons. We Need the Name of the App, Site, or Addon You Are Clicking.**

If You Are Having System Wide Issues, Please Send Us Specific Details about How You Came to This Conclusion. For Example, Have You Tried Using Your Other Kodi Build? Or Another Kodi Addon? If so, Which Ones? Did You Try Exiting Out of Your Kodi Builds and Clicking Directly on Your Streaming Apps like Cinema, Cyberflix, Live Net or Haystack TV.

Also Tell Us Any Steps You Have Taken. Have You Restarted Your Device? Restarted Your Router and Modem? Have You Done a Speed Test for Your Internet? If so, Were Your Results Lower than You Normally Get?

If You Have Specific Issues with the Hardware and Software on Your Device, Like Audio Issues or Issues with the Google Play Store? Have You Received a Low Storage Space Message? Or Updated Your System Software Recently? Also, Have You Updated Your App and Have You Contacted NVIDIA? We Just Need to Know Where You Are in the Process. The More Details, the Better. Thanks Again!
