

CUSTOMER REPAIRS FORM

At Bobux we use premium materials.

We understand that all textiles are not created equal and we use each in a way that utilises their specific strengths and best contributes to the overall performance of the shoe.

Given the diversity of our range, we may use a mix of materials and you'll find all the materials used in any given shoe listed in the description of that shoe.

Below you will be able to see what care is recommended for each material so you can make good decisions and maximise the longevity of your Bobux shoes. Hope it helps!

DO NOT BLEACH, SOAK OR TUMBLE DRY YOUR BOBUX SHOES

ACTION LEATHER

Wipe with a damp cloth. Dry naturally, away from direct sunlight.

CANVAS

Use a fabric stain remover for any deep stains, and scrub affected area with a nailbrush. Rinse with cold water, and allow to dry naturally. Avoid getting stain remover or water on any other areas of the shoe, as all materials have different requirements. Dry naturally, away from sunlight. Do not bleach, soak, or tumble dry.

FULL GRAIN LEATHER

Polish every 2 weeks to keep the shoes in top condition. Light scuffs can be reduced by rubbing a matching coloured shoe polish over affected area. Avoid fully immersing leather in water. Dry naturally, away from direct sunlight. Do not bleach, soak, or tumble dry.

LEATHER

Polish every 2 weeks with a natural polish such as beeswax to keep leather soft and protected. Beeswax will also provide an element of protection from water. Light scuffs can be reduced by rubbing beeswax over affected area. Avoid fully immersing leather in water. Dry naturally, away from direct sunlight. Do not bleach, soak, or tumble dry.

GLOSS LEATHER

Wipe with a damp cloth. Dry naturally, away from direct sunlight.

CUSTOMER REPAIRS FORM
