

AFTER CARE INSTRUCTIONS

- ♣ Use Tattoo Aftercare Balm and keep the area moist for 5-10 days. Use a clean Q-tip to lightly apply light coat over the area several as needed daily.
- ♣ Eyebrows will require moisturizing for at least 3 days. Keeping the pigmented skin moist with an ointment will control the amount of drying and crusting. This will help with color retention.

Avoid

- ♣ Any type of skin peels or products containing Retin-A and glycolic over the pigmented area
 - ♣ Any makeup over the pigmented area.
 - ♣ Hot steamy showers or long baths. Keep your face away from the shower head and apply a thick coating of Tattoo Aftercare Balm while bathing or showering.
 - ♣ Avoid soap, cream or lotions on the pigmented area. Wash and apply around the area.
 - ♣ No swimming, saunas or hot tubs for 10-14 days after the procedure.
 - ♣ Increased sweating
 - ♣ Practicing sports
 - ♣ Sun tanning or salon tanning
 - ♣ UV/UVA Rays or chemicals as they have been known to cause a shift in color and premature fading
 - ♣ Any laser or chemical treatments or peelings
- Performing tasks related to heavy household cleaning such as garage or basement cleaning where there is a lot of airborne debris
- Drinking alcohol in excess, as it may lead to slow healing of wounds

Do Not

- ♣ Pick, peel, or scratch. This could cause scarring and/or removal of color.
- ♣ Do not touch the area except for applying Tattoo Aftercare Balm or Antibiotic Ointment.

Note

- ♣ Color will appear very intense and dark immediately after your procedure. The color is sitting on top of the skin. Once the skin starts healing or flaking, the color will fade considerably as it heals beneath the skin.
- ♣ The final color should not be considered for approximately 6-8 weeks after the final visit. Do not be alarmed if it appears that most of the color is flaking off. Some of this crusting will appear on your Q-tip- this is normal. This is the superficial color and is part of the natural healing process.
- ♣ The sun can cause fading to the pigmented area. Always wear a light coat of sun block on pigmented areas.

If you suspect any signs of infection (including abnormal redness, swelling, etc) contact your doctor.

PLEASE NOTE:

FREE FOLLOW-UP APPOINTMENTS MUST BE WITHIN 30DAYS OF THE FIRST APPOINTMENT. AFTER 30DAYS IT WILL BE CONSIDERED A TOUCH-UP AND CHARGED THE ADVERTISED AMOUNT.
