GALATEK

SPECIFICATIONS

Technical Parameters:

Material: Stainless Steel
Weight: 46g
Thread: 510
Size: 24.5x33.5mm

Kit Inclusions:

- 1 x Galatek RDA
- 2 x Oni Coils Fused Clapton (0.3ohms each)
- 1 x Hex Tool
- 1 x Squonker center pin Spare Parts
- 1 x User Manual

Parts:

COMPONENTS

Top Cap and Build Deck:

Important Notice:

This Rebuildable Drip Atomizer is only for highly experienced vapers. Building coils should be supported with a wide knowledge about **OHM'S LAW**.

Please read carefully and use Ohm's Law for your safety. Only use tested devices that support the resistance of your coil build. Only use devices that supports safety cut-offs for high operating temperature, too low of coil resistance, hot battery operation and the like. Please check our website, ASMODUSUSA.com, for more information regarding safe operation and battery warning letter.

Air Flow Management:

Install the Galatek on your favorite device. Hold the cap firmly from the bottom part and slowly twist it to either direction (left or right) while checking the vent hole until desired air flow is achieved. You need to check by firing and inhaling vapor to achieve the desired air volume intake for more personal set-up.

How to build the RTA:

1. Before starting make sure your hands are clean.
2. Taking Galatek Deck apart and cleaning each part.

3. Installing and positioning the pre-wrapped coil.
Place the coil between the posts and wrap the ends around the screws and tighten up, once all in place make sure the coils are fixed in the center of the post and align with the air hole, and also make sure the coil is not touching the base.
4. Cutting the ends of the wires off.
5. Cutting a strip of cotton and make sure it's not too much and not too less.
6. Inserting the cotton, and placing it in the middle.

7. Cutting the cotton, at an angle and make sure it's not too short and not too long
8. Wet the coil with your e-liquid and adjust the cotton.

Warning: Coils must be checked for resistance before they are fired on a device, and re-checked periodically to ensure resistance remains the same.

If you need any additional information or have any questions about the products or its use, please contact your local ASMODUS agent or to visit our website www.asmodususa.com

Conversion to squonker RDA

This RDA can be used as squonker RDA for squonker type devices. This kit has an extra pin that can convert the RDA from regular 510 to squonker 510 connector by just unscrewing the regular pin and replacing it with the supplied 510 squonker pin.

Attention:

1. Before use please read the manual carefully.
2. Connect the atomizer to a power source that can handle sub-ohm coils.
3. Please avoid making the e-liquid into your mouth directly.
4. Please do not keep any liquid inside the atomizer if the device is not going to be used for a long period of time.
5. Please refill the tank when the e-liquid is nearly used out to avoid dry-burning the atomizer.
6. Please do not drop, throw or mishandle this product as the outer shell or inner components may become damaged.
7. In order to prolong the operation of your product please keep it away from excessive temperature and humid environment.
8. Please keep this product away from children and pregnant women.

Legal Disclaimer:

Underage sale is prohibited depending on your country/region legal smoking age. 18+ and over 21+ in other countries/regions.

WARNING:

This product is not intended for use by persons under legal smoking age, non-smokers, pregnant or breastfeeding mothers, or persons with or at risk of heart disease, high blood pressure, diabetes, or taking medications for depression or asthma.
