| PART NUMBER | ITEM DESCRIPTION                                                                                                               |
|-------------|--------------------------------------------------------------------------------------------------------------------------------|
| SPG3        | Complete Deluxe Spray Gun, 7' Chemical Resistant Tube, 5 Gallon Stainless Steel Tank, Regulator, Gauge, Viton Seals Throughout |
| SPGH        | 7' Chemical Resistant Tube, Viton Seals Throughout, Antikink Springs & Tank Fittings                                           |
| WSG         | Deluxe Spray Gun Only                                                                                                          |
| SPG-210     | 1/4" Nylon Chemical Resistant Tubing                                                                                           |
| SPG-255     | Viton Main Tank Seal                                                                                                           |
| SPG-205     | Five Gallon Stainless Steel Tank w/Viton Seals                                                                                 |
| SPG-230     | Coupling - 1/8" NPT to 1/4" Chemical Resistant Tubing                                                                          |
| SPG-235     | Tee Coupling - 1/4" Chemical Resistant Tubing                                                                                  |
| SPG-225     | 7/8" Tank Inlet Fitting w/ 109 Viton Gasket                                                                                    |
| SPG-220     | 7/8" Tank Outlet Fitting w/ 109 Viton Gasket                                                                                   |
| SPG-200     | Regulator & Gauge - 1/8" NPT                                                                                                   |
| SPG-240     | Viton O-Ring 109                                                                                                               |
| SPG-250     | Viton O-Ring 007 - Pressure Relief                                                                                             |

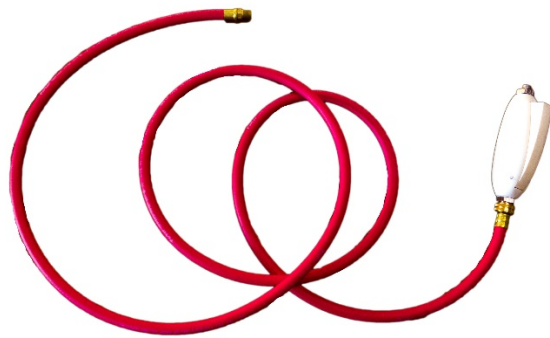

All Purpose  
Deluxe Spray Gun  
&  
Pressurized Liquid  
Chemical Spray Tank

Solvent Resistant  
Versatile  
Lightweight  
Mobile  
Simple to Operate  
Simple to Clean  
Simple to Change Fluids

100% Stainless Steel, Nickel Plated  
Acetal Plastic, Nylon, & Viton  
Components

# All Purpose Deluxe Spray Gun & Pressurized Liquid Chemical Spray Tank

- Solvent Resistant •Versatile •Lightweight •Mobile
- Simple to Operate •Multiple Solvents •Clean

## Deluxe Spray Gun

- Emits a fine conical misting spray
- Lightweight, ergonomic shape eliminates operator fatigue
- Durable construction promotes long life
- Operates at any pressure from 40 to 120 psi
- Self-coiling, resilient, anti-kink nylon hose
- Viton' sealed fittings
- Tough Acetal plastic, nickel plated brass, nylon and Viton components enable the Deluxe Spray Gun to withstand every-day use and resist solvents

## Simple To Operate

- Fill the tank with the desired water based or solvent based spray solution
- Connect compressed air supply to the regulator and set to the desired pressure (40 to 120 psi)
- Either use the Pressurized Liquid Chemical Spray Tank and Deluxe Spray Gun at a fixed location or disconnect the air supply and use as a pressurized mobile unit or at a satellite workstation

## Pressurized Spray Tank

- Five Gallon stainless steel tank complete with Viton gaskets and seals
- Handles all water based and solvent based spray solutions
- One-way, safe and reliable pressure regulator and gauge
- Protective rubber coating on handles and base for safety and ease in transport
- Large oval lid for quick cleaning and changing of spray solutions
- Constructed of solvent resistant stainless steel and Viton components

## Versatile

- Capable of operating several stations from one tank. Simply insert coupling tees on the nylon hose and add extra Deluxe Spray Gun to suit your needs.
- Dual rubber handle grips, provide ease in movement to satellite workstations
- Lightweight at just under 10 lbs.
- Ability to handle all water based or solvent based treatments without worry-prespot spotting chemicals, leveling agents, spray starch, water repellents or water mist

- To use as a mobile unit, connect air supply to regulator. Pull the regulator handle out and turn clockwise (+) until desired pressure is achieved and release. To maintain desired pressure once air supply has been disconnected, pull the handle out and turn counter-clockwise (-) until the handle stops and release.

Disconnect air supply and move unit to the satellite workstation
