

Our Mission

There With Care's mission is to provide a wide range of thoughtful and fundamental services to children and families during the critical phase of a medical crisis. We serve families referred by medical agencies by building a network of services and people who ease the burden of life's day-to-day obligations with compassion and care.

Our History

Since its founding in 2005, There With Care has grown to provide support for more than 3,200 families with the help of more than 700 volunteers and local business partners. Each day There With Care's Program Team serves an average of 150 families facing a medical crisis.

Family Support By The Numbers

A referred family receives support from There With Care for an average of 100 days at an average cost of \$4,022. Over 87% of the families we serve live in financial distress. Since 2005, There With Care's community has contributed \$5,066,298 in donated in-kind items and \$4,481,718 in donated volunteer and professional hours.

How We Connect

There With Care Colorado serves families referred from medical facilities in the Denver Metro, Boulder and Broomfield areas. These families travel from across Colorado and the seven surrounding states to bring their child to one of the 15 medical facilities we serve. There With Care of the Bay Area receives referrals from the Lucile Packard Children's Hospital and UCSF Benioff Children's Hospital. In the near future, new There With Care chapters will help families facing medical crisis in the Los Angeles, Chicago and Boston areas.

Who We Serve

There With Care serves families and children facing critical illness by providing programs and services that support the wholeness of each family during a medical crisis. While working with these families to identify their day-to-day stresses, There With Care provides tailored support to help ease their burdens. This support can include: transportation assistance to and from hospital treatments; grocery and meal deliveries; car seats and baby essentials for critical newborns in the neonatal ICU; housecleaning for families with immune compromised children; family therapy programs; patient and sibling mentoring; and much more. This broad range of program services allows There With Care's staff to easily transition between levels of support as the family's needs change during a medical crisis.

Families referred to There With Care are supported by a team of Program Coordinators, Volunteers and Professional Service Providers who work to surround each family with meaningful assistance. During a fragile time, There With Care helps families have more time to focus on what's most important, their children.
