Product:	Cameras, NVRs	Page:	1 of 6		

# **HIKVISIO**N

# How to add IPC with POE function to NVR

# Description

POE cameras could be added into NVR which supports POE function with both **Manual** mode and **Plug-and-Play** mode. When applying the Plug-and-Play mode, please kindly make sure the password of the camera is the same with the NVR, or you could set the password of the camera to 12345.

*Note*: Plug-and-Play mode could only be applied when the camera is added directly to the POE port of a NVR.

# Preparation

- 1, POE cameras
- 2, POE NVR
- 3, POE switch

# How to add POE cameras to NVR using Manual mode:

Steps:

- 1, Connect your camera to the POE port of the switch. Connect your NVR to the same switch.
- 2, Go to Camera Management->Camera->IP Camera, select any channel and click Edit.

## Note:

1, If you select the Manual mode to add the IPC with POE function, the password of the IPC could be different from NVR.

2, Do not press **One- touch Adding** unless the cameras' passwords are the same with the NVR password or the password of the camera is 12345.

# How to add IPC with POE function to NVR using Plug-and-Play mode:

## Steps:

1, Connect your camera to the POE port of the NVR. Assume you connect your camera to the POE port 2.

2, Go to **Camera Management**->**Camera**->**IP Camera**, highlight the second channel (D2) and click **Edit**.
