

QUICK-CRATE®

The tightest box in the business

Custom Trade Show Applications

Quick-Crate's customized packing solutions ensure your tradeshow display remains safe between shows and during shipping. Removable panels mean products can be accessed from the top or any side within minutes. Each crate collapses to about 9" so they can be stored behind your display during the show and quickly reassembled afterwards. No more waiting hours for your crates to be returned from storage. Options include ramps, shelving, cradles, casters, dunnage, stenciling and more.

Optional ramp panel gives quick, easy access to your stored exhibit

Our own tradeshow exhibit collapses into 2 Quick-Crates

Removable Casters

Custom Stenciling

Quick side panel access
