

QUICK-CRATE®

The tightest box in the business

Warehouse & Supply Chain Solutions

Warehousing Storage System

Quick-Crates allow you to design a complete storage system for all of your warehousing, inventory and shipping needs. Since our design has been Military tested to withstand 10,000 lbs of stacking pressure, your storage layout options are considerable. You can also use crates individually to transport and store a variety of products.

- Custom crate sizing
- Ability to stack irregular/bulk goods
- Provides maximum cubic storage space and inventory protection
- Empty crates can be collapsed to 9" tall for maximum use of storage space
- Can be used in lieu of storage racks
- Customize with shelving, casters, painting/stenciling and more.

Warehousing Storage System

Strength Test - 9000 lbs of load
