

ANTIMICROBIAL DISPOSABLE HOSPITAL CURTAINS

Fantex® Antimicrobial Protection

Hygenica's IPC curtains are treated with Fantex®, Hygenica's proprietary and patented biocide. Fantex® is effective against a broad range of pathogens and remains active for the lifetime of the curtain.

Fantex has been tested against feline coronavirus, the laboratory strain of Coronavirus that is used to validate activity against this type of virus. It was tested to EN 14476 Quantitative suspension test for the evaluation of virucidal activity in the medical area, the official European standard for this type of activity and **passed with a greater than log 4 reduction in virus level in 5 minutes contact time.**

ADDITIONAL FEATURES:

Our polypropylene ultrasonically bonded curtain tidy (tie back) holds pleats neatly in place, keeping the curtain out of the way when not in use. Curtains come with labelling for installation monitoring as standard and are available in 6 colours and various sizes.

**Please Note: All in One Medical label will be rebranded to Hygenica over a period of time. You may still notice some boxes have All in One Medical as we phase these out.
