# GO GREEN Aeropleat® III

Media And Wire From Recycled Materials

## The Economical GREEN Choice

### For Today's Applications

Includes commercial buildings, educational facilities and specialty manufacturing. As a pre-filter the Aeropleat III offers protection for the higher efficiency final filters required for today's high technology applications.

### Built For Today's HVAC Systems

- Has 10 pleats per linear foot (2" deep model) with a radial pleat design for full use of media area.
- **The media is manufactured from 100% recycled materials** in accordance with Camfil Farr's sustainable initiatives.
- Includes welded wire media grid that is treated for corrosion resistance and to prevent media oscillation or pull-away. **The wire grid is manufactured from reclaimed metals** in accordance with Camfil Farr's sustainable initiatives.
- **Has a biodegradable Kraft board frame** that creates a rigid and durable filter pack. The frame is made of virgin board produced under an initiative for sustainable forest management. Virgin board has up to two times the strength of board constructed with recycled materials. The pack will withstand 2.0" w.g. without failure.
- Available in 1", 2", and 4" depths

Now a M.E.R.V. 7
