

WaterGlow™ Lighting

Give Your Fountain and Aerator Life After Dark

Extend the class and elegance of your fountain or aerator into the evening hours with WaterGlow™ Lighting Systems from Kasco. Kasco's state-of-the-art LED lighting systems guarantee energy efficiency so you can enjoy beautiful lighting without worrying about your electric bill. With our range of options you can get the exact look and feel you want. Kasco WaterGlow™ lighting delivers the reliability and efficiency that Kasco is known for.

LED (Light Emitting Diode) lights are the only lights Kasco sells and are extremely efficient as they use energy toward the production of light not toward the production of heat. Less heat means longer bulb life and eliminates the need to fully submerge the bulb underwater. This allows more light to reach your fountain or aerator display, creating an increased visual impact. The visual impression you see from Kasco's LED lighting systems depends on viewing angle, background light pollution and pattern height and width. You will notice that Kasco has suggested parings for lights and horsepower. These are only guidelines as installation site conditions might impact your impression.

TAKE YOUR WATER DISPLAY FROM FORGOTTEN, TO FEATURED

Kasco's state-of-the-art LED lighting packages are an elegant and distinctive addition to our fountains and aerators that allow you to enjoy your displays around the clock. Available in composite or stainless steel housings and in several color options, these versatile LED lights deliver a pleasing look and exciting atmosphere. These LED lights will withstand the test of time and add years of enjoyment to your water display.

LED RGB Color-Changing Lights in Composite Housings

Kasco is pleased to offer our WaterGlow™ LED RGB lighting kits for our fountains and aerators. These light kits are the ultimate in custom, decorative lighting and will add a vibrant level of fun and excitement to any backyard pond, lakefront, event venue or related setting. Using the included remote control, easily choose from 9 different colors, 3 different rhythmic sequencing patterns (flash, bloom and smooth) and 5 different levels of brightness. Kasco's RGB light kits can even be set to music by using the 3.5mm connector and any music playing device with a standard AUX input. These high performing RGB LED lighting systems will deliver brilliant, show stopping color displays

- White, warm white, red, green, blue, orange, yellow, cyan and magenta
- Available as a 3 fixture (1/2HP-1HP units) or 6 fixture (2HP-3HP units) kit
 - Visual impression of RGB systems on 2HP and 3HP units depends on background light pollution
- Each kit includes fixtures, power cord, remote control, 3.5mm audio connector and a 120Vac input RGB control panel
- System uses 24Vdc at just 5W per fixture
- 1-piece composite housing ensure water-tight operation
- Lens is secured with cutting-edge technology for leak-free assembly
- Durable construction ensures many hours of enjoyment
- No need to change lens to achieve new color
- Includes all necessary mounting hardware
- 2 year warranty

LED Underwater Landscape Lights

Kasco is excited to offer an underwater accent landscape lighting system to beautifully uplight your water feature. Surrounded by a durable, corrosion-resistant, stainless steel housing and bracket, these LED lights can easily be mounted underwater in countless applications and adjusted to several different angles. The main power cord comes with a three-prong connection to plug into a normal household current 120V GFI protected outlet. Set your water feature apart from the rest with Kasco's stainless steel landscape lights.

- Comes standard as classic white
- Up to 10 fixtures from 1 power location, customize length between fixtures
- Quick disconnect can be added for additional fee
- Fixtures connected via daisy chain arrangement
- Fixtures must be submerged completely underwater
- Includes bracket that can easily be adjusted to many angles for the perfect lighting
- Each fixture is 19 watts
- 2 year warranty

4 Fixture Light Kits for Non-Kasco Fountains

If you have an existing, non-Kasco branded fountain or aerator and you'd like to add Kasco quality lighting, this is the solution for you. These 4 fixture kits come complete with underwater rated power cords and universal mounting brackets.

- Comes standard as classic white and includes orange, red, blue and green lenses
- Composite housings have 11 watt fixtures
- Cord lengths available in 50 ft., 100 ft., 100 ft., 150 ft., 200 ft., 250 ft., 300 ft., 400 ft., and 500 ft.
- 2 year warranty
