

scott  aerator

Healthy Aquatic Environments.

Always Sweep

**Move The Muck.**

DRAMATICALLY IMPROVE WATER  
QUALITY WHILE SAFELY REMOVING  
SEDIMENT BUILDUP.

*AquaSweep* keeps your beach front,  
dock area or canal clean from muck, silt,  
and bottom gunk while also being fully  
adjustable to blast algae, trash and floating  
debris on the surface. The high-velocity  
water propulsion of the *AquaSweep* dock  
mount conveniently pushes bottom debris  
50 feet or more, away from swimming areas  
and boat lifts.

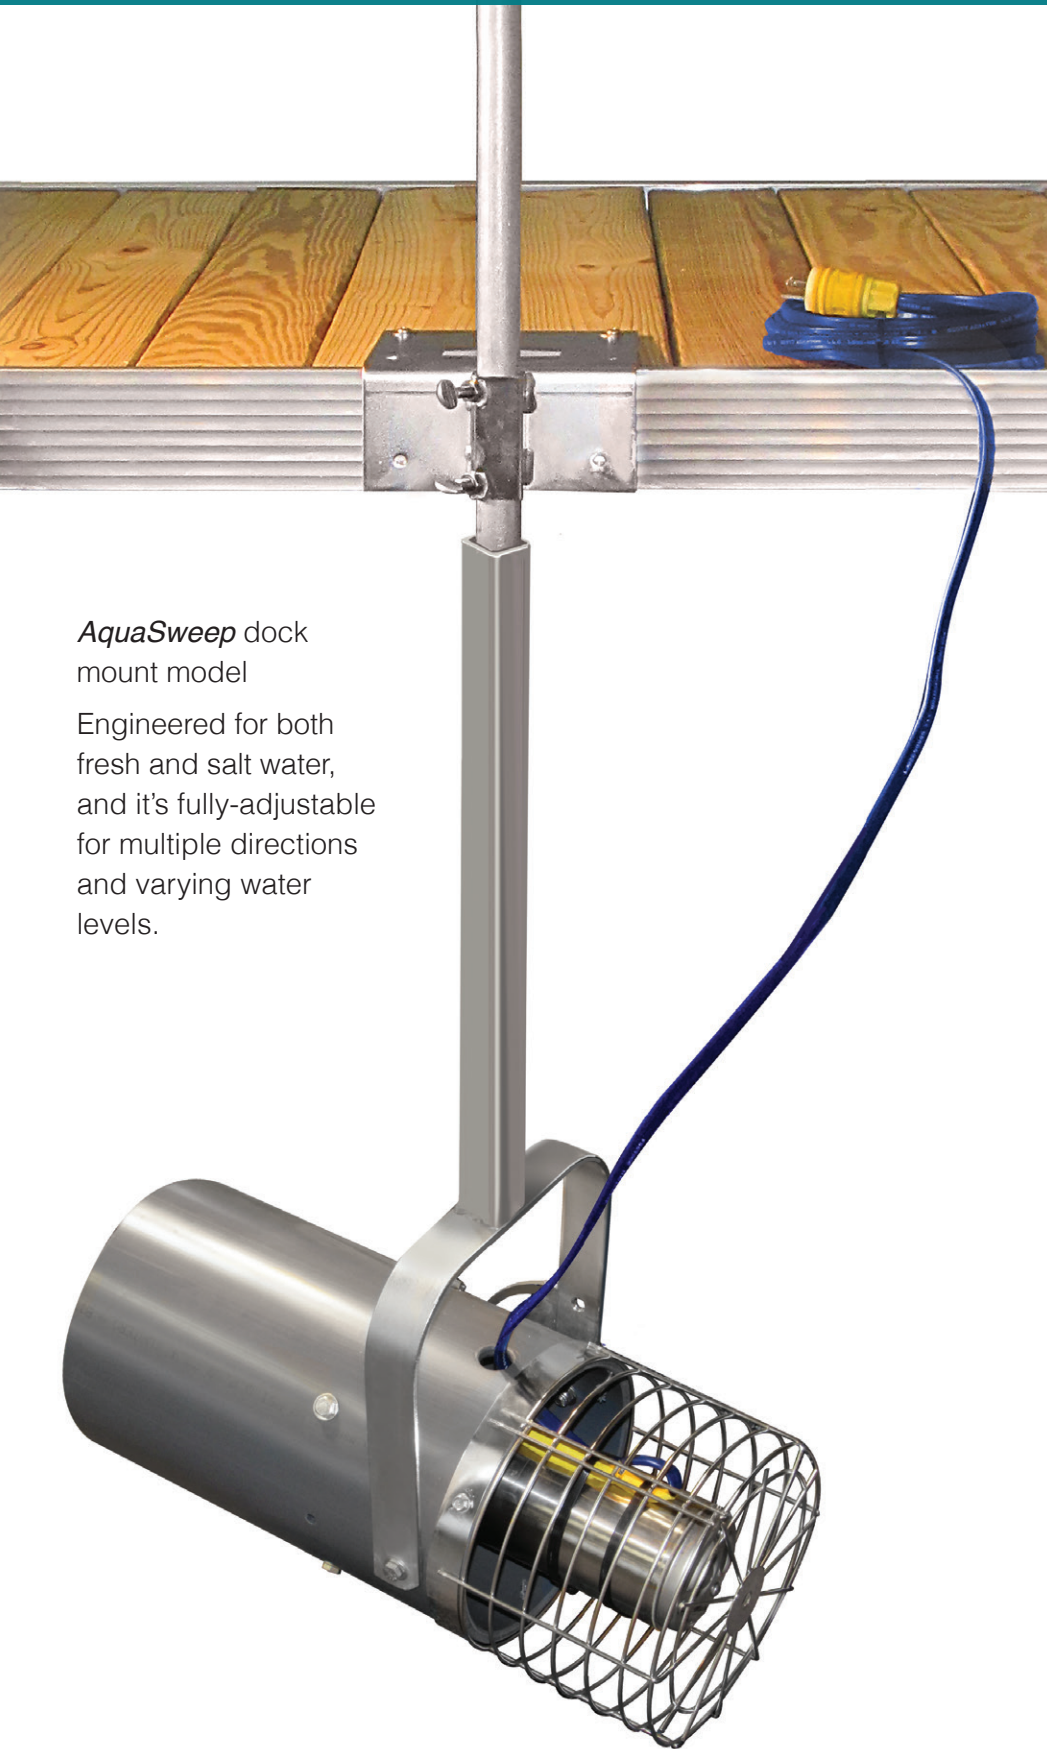

**Enjoy Your Time on the Water or Dock.**

COMPARE WITH SIMILAR PRODUCTS  
AND YOU'LL SEE WHY THE  
AQUASWEEP BY FAR SURPASSES  
ANYTHING ELSE ON THE MARKET IN  
BOTH PERFORMANCE AND QUALITY.

Some of the differences:

- The *AquaSweep* is oil free. The competitor's model requires oil to be added and changed. Also, using the *AquaSweep* means no chance of disastrous oil leaks.
- The *AquaSweep* runs at 3,450 rpms. The competitor's, even utilizing the 1 HP motor, runs at under 2,000 rpms. This amounts to the *AquaSweep* moving 400 gallons of water per minute compared to their 180 gallons per minute.
- The *AquaSweep* is manufactured using American made stainless steel, even the motor. The competition utilizes powder coated metal.
- The *AquaSweep* comes standard with an unconditional 5-year motor warranty. Theirs, just 2 years.

## Model Options and Accessories

### *AquaSweep* dock mount model

Engineered for both fresh and salt water, and it's fully-adjustable for multiple directions and varying water levels.

### Fully Programmable Oscillator

Our fully programmable oscillator attachment makes moving muck even easier. No need to turn the *AquaSweep* in its mounting; the oscillator does it for you! We pre-program the oscillator to rotate the *AquaSweep* in 20 degree increments every 20 minutes; you set it for any radius you wish. Then plug it in and forget about it! The oscillator attachment can be added later, or to an existing *AquaSweep* too.

### *AquaSweep* floating model

Designed to conveniently push floating algae, trash and leaves to a location of choice for easy pick-up. It will not adjust down to the bottom to move muck; it's designed to create a strong surface current. Fully-adjustable for various directional flows, and for tidal changes or water level variations due to weather conditions. Stainless steel and high density polyurethane construction is both durable and long lasting, even in salt water!

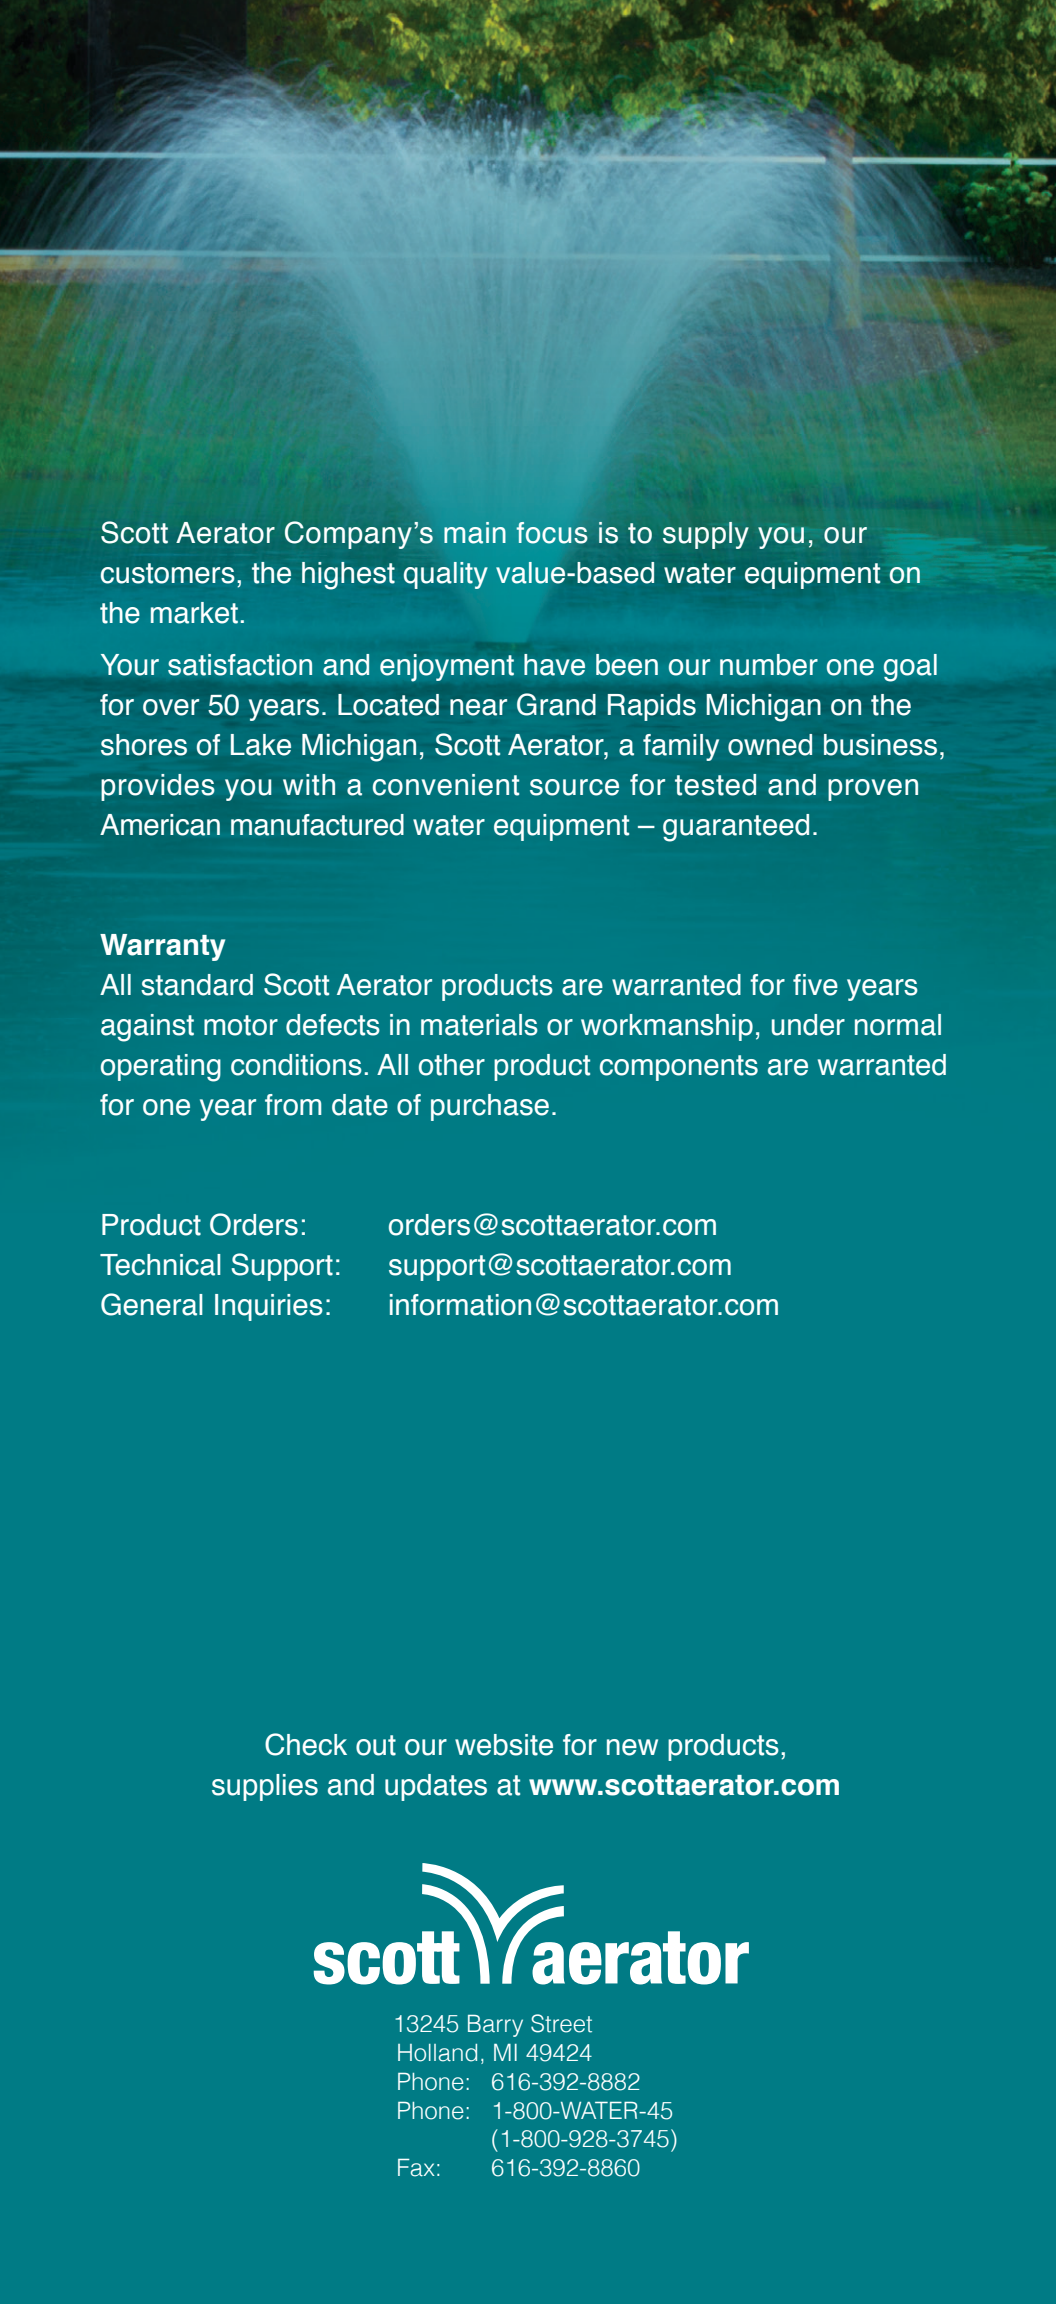

### Dock Mount Model Specifications

ITEM#	DESCRIPTION	FLOW RATE	FLOW DISTANCE	HEIGHT	WEIGHT	VOLTS	RATED INPUT AMPS	WATTS
15000	1/3 HP DOCK MOUNT	300 GPM	40 FT	73"	40 LBS	115	8	630
16000	1/2 HP DOCK MOUNT	400 GPM	50 FT	89"	55 LBS	115	10	680

### Floating Model Specifications

ITEM#	DESCRIPTION	FLOW RATE	FLOW DISTANCE	CORD LENGTH	WEIGHT	VOLTS	RATED INPUT AMPS	WATTS
15001	1/3 HP FLOATING	300 GPM	40 FT	35'	42 LBS	115	8	630
16001	1/2 HP FLOATING	400 GPM	50 FT	35'	48 LBS	115	10	670

Scott Aerator Company's main focus is to supply you, our customers, the highest quality value-based water equipment on the market.

Your satisfaction and enjoyment have been our number one goal for over 50 years. Located near Grand Rapids Michigan on the shores of Lake Michigan, Scott Aerator, a family owned business, provides you with a convenient source for tested and proven American manufactured water equipment – guaranteed.

### **Warranty**

All standard Scott Aerator products are warranted for five years against motor defects in materials or workmanship, under normal operating conditions. All other product components are warranted for one year from date of purchase.
