SET COIN ACCEPTOR BEFORE FIRST USING

Coin Acceptor Standard Body View

>Adjust Open-Close button to 'NO'(normal open).

>Adjust Fast,Medium,Slow button to 'Middle'.

>Adjust sensitive button to the 'NOM' position.

(These three buttons were set in right position before machine leaving factory)

1.Adjust the setting button to the 'SET' position, enter programming mode.

2.Long press the Coin-value setting button until you hear a 'BI' sound then LED display show '00'.this mean all the coin value setting is erased.

3.Set charging time. Press the Coin-value setting button to adjust charging time. If you press once, LED display will show '01', it means charging time is 20 minutes; if you press twice, LED display will show '02', it means charging time is 40 minutes.

4.Try to find several same value coins which are old and new as much as possible, insert them to coin acceptor in turn, stop when you hear a 'BI' sound.

5.Adjust the setting button to 'START' position, exiting programming mode.
