

## USER MANUAL

FOR MECHFORCE HURRICANE FIDGET SPINNER  
BRASS, STONEWASHED

**WARNING: CHOKING HAZARD TO CHILDREN UNDER AGE OF 3 YEARS. CONTAINS SMALL PARTS.**

### SPECIFICATION:

- PN: MF-HS-BS-TG-A
- Dimensions: Length: 2.8" x Width: 1.1" x Thick: 0.7"
- Weight: 3.0 OZ
- Main Body Material: Brass
- Bearing Cap Material: Brass / Stainless Steel
- Coating Technologies: Stonewashed
- Coating Color: Stonewashed Brass
- Bearing: Full Ceramic Ball Bearing, 688 Modified
- Product Origin: Made In USA, Bearing Imported
- PATENT PENDING

### MAINTENANCE:

#### Bearing Maintenance:

The bearing is clean when its new.

Do not apply grease or any types of lubricant to the bearing. Doing so will increase rolling resistance and decrease spin time.

The full ceramic bearing has a removable ball cage. Do not use force on the ball cage because it may fall off from the bearing which will result in total bearing disassembly.

Use 91% Isopropyl Alcohol to degrease the bearing.

**WARNING:** Isopropyl Alcohol is extremely flammable and can cause skin and eye irritation. Refer to Isopropyl Alcohol's MSDS (Material Safety Data Sheet) for more information.

Adult supervision is required for bearing degreasing.

Avoid shock damage or dropping from high ground. Full ceramic ball bearings are brittle and can be fractured from shock damage.

Replacement bearing can be ordered by sending purchasing request to [info@mechforce-usa.com](mailto:info@mechforce-usa.com).

#### Balancing:

The spinner is factory balanced. However, it may become unbalanced in following conditions.

Do not remove material from the spinner body. Doing so will make the spinner become unbalanced.

Do not apply aftermarket coating to the spinner body. The coating may be unevenly distributed on the spinner's surface which will result in unbalance.
