

CARIBE CHIC HIGH TABLE

M AMES
D SEBASTIAN HERKNER

Inspired by the unique nature of the Colombian Huila region, which is characterised by the Tatacoa desert and the Rio Magdalena, ames presents the new caribe chic series. The series includes a lounge chair, and a dining chair, as well as the basket table, high table, low table and dining table marble top. Sebastian Herkner is adding to the successful caribe indoor series with the new products and is now choosing elegant, muted colours which are inspired by the colours of the earth, the desert and the water. He also selects the finest Italian marble for the tables in the series, which are available in designs with marble tops. The caribe chic series is manufactured on the Colombian Caribbean coast and, in order to create the products, recycled plastic cord and powder-coated steel are used and manufactured using the traditional "Momposino" weaving craft.

Available with or without marble top.

D 18.1" x H 19.7"
