

LÁSZLÓ CHAIR

M ATELIER HAUSSMANN

D ANDREE WEISSERT

László is a cantilever chair standing firmly on 4 feet. Like almost all products from Atelier Haußmann, László is a tribute to the curved steel pipe. The precise proportions of the chair, the shapes of the plywood shells in addition to slightly movable surfaces ensure a high degree of seating comfort.

Atelier Haussmann has focused on developing a sturdy and comfortable chair that you can sit in for a long time. The footrest and the fact that Laszlo has no front legs is a turn to user behavior. It allows taking different postures.
