

LEIPZIG TABLE

M ATELIER HAUSSMANN
D ANDREAS HAUSSMANN

Leipzig table consists of a cylindrical table frame made of bent 2 mm perforated steel sheet and an ash wood tabletop. Leipzig was created as a workshop design and has made its way into the Atelier Haussmann collection. Despite the simple shape, the overlapping perforations always create new optical moments. The table frame is produced in the Atelier Haussmann's own metal workshop and is available with and without a tabletop. The upper ring can be screwed onto wooden table tops, HPL composite panels, and even stone. The bottom ring comes with felt glides.

Table frame: D 24.0" x H 27.6"
Tabletop: D 55.1" x H 2"
