

PREVA COLLECTION

M EGOÉ
D EGOÉ

The style of the Preva series is sophisticated and visually light while it is clear that the chairs are sturdy and durable. The combination of rounded metal parts with wood creates a composition of a beautiful work of art which will fit anywhere where things of the highest quality are demanded. It draws you in with its well-thought-out shape and generous size and makes you want to comfortably rest and leave all of your troubles somewhere far behind.

The frame is made out of zinc-coated strips and has a powder coated finish. The seat and the backrest are made out of tropical wood or locust wood. The chair comes with two neck cushions which are made out of PUR and Batyline mesh material. The armrests of both of the chairs are made out of high-pressure laminate (HPL).
