

## ST10

M HUSSL  
D ARGE2

Behind the idea of the ST10 there is the sandwich technology, a principle from the skiing industry. The rear legs consist of an outer tension layer compounded with aluminum, bonded with a wood composite middle core. In the back section the rear legs taper down to only 8mm. The result: a sophisticated rest which cushions lightly. In connection with a reduced basic design. Unconventional. Comfortable.

W 19.7" x D 20.1" x H 32.9"  
SEAT HEIGHT 17.9"
