

## L8 TRABA TABLE

M LOEHR

D DAVID UND JULIAN LÖHR

TRABA is designed for longer spans. The tabletop of the solid wood dining table is reinforced by a tall supporting beam. This construction gives the furniture enormous structural rigidity, like an oversized girder profile. Formally, this results in a play between surface and space, as the view of the table only allows a glimpse of the foot area. The leg sections at the ends are fitted flush to the table surface, thus accentuating its sculptural appearance. TRABA can be dismantled into four parts and is available in various wood finishes and three different lengths.

L 59.8" x W 39.4" x H 29.5"

L 87" x W 39.4" x H 29.5"

L 115" x W 39.4" x H 29.5"
