

L9 PORTAL

M LOEHR

The PORTAL is an intriguing object, similarly decorative and functional. A single pin reflected in the center of a circular mirrored surface creates the illusion of a hovering rod. This hook is a place to store or stage. The uncertainty of use is intended — it is up to the user for which scenario PORTAL is selected: As an eye catcher in the hallway, as a place for most valuable jewelry, a stage to present goods in a retail environment or just a playful, optical piece.
