The modular FISCHER Shelving System combines modern living with traditional craftsmanship. FISCHER is an ideal match for a variety of life situations and colorful living spaces due to its flexible application. Made with great care, the system works completely without screws. The design is perfectly pure. Clear lines, which are entirely related to the function, characterize the appearance. Details such as the elaborately milled handles complete the elementary construction. The interaction of materials and color combinations sets both visual and haptic accents. FISCHER is a timeless furniture. FISCHER fits in all lives.

Design
OUT, 2015
