

# KOCH MIRROR

OBJEKTE  
UNSERER  
TAGE

The KOCH Mirror brings expressive colors and graphic shapes into harmony. The accurately cut mirror glass is embedded flush into the wood. The lively grain of the ash gives the colors character. Ultimately graphically simple and reduced, an attractive combination of color, shape and material is created. The suspension is placed in such a way that there are three options for hanging up the KOCH Mirror. In combination or individually, KOCH gives every room a new perspective. Further information and photographs can be found in the press material.
