

EIERMANN 2 Table

M RICHARD LAMPERT

For dining tables with a depth of either 80 or 90 cm, we recommend a modified version of the original frame. This version was not designed by Eiermann and its detailing is not as sophisticated as in the original. However, this frame offers ergonomic benefits for dining tables. Unlike the original Eiermann 1 frame, in this modified version, the crossbars are not slanted but are positioned in a right angle between the two sides; either central or offset. This dining table is available in a stainless steel design and with a weatherproof solid wood top for use on balconies or patios.

Frame:

L 31.5" x W 26" x H 26"

L 39.4" x W 26" / 30.7" x H 26"

L 53.1" x W 26" / 30.7" x H 26"

Top:

L 47.2" x W 31.5"

L 55.1" x W 31.5"

L 63" x W 31.5" / 35.4" L 70.8"

x W 35.4"

L 78.7" x W 35.4" .

height adjustable (adjustment rods on request)

For a table height of 28.3" (Euronorm) you will need height adjustment rods.

We strongly recommend using rubber caps between frame and tabletop to prevent the tabletop from sliding

TABLE TOP SUPPORT

white/ black
54.3" x 1.2" x 1.2"

A technical line drawing of a table frame, showing the side view of the legs and cross-bracing. The drawing consists of two vertical lines representing the legs, connected by two horizontal lines representing the cross-bracing. The top horizontal line is slightly offset to the right, and the bottom horizontal line is slightly offset to the left. The drawing is simple and uses black lines on a white background.
