

FAMILLE GARAGE

D ALEXANDER SEIFRIED, 2011

M RICHARD LAMPERT

With this furniture system, nothing remains the way it seems in the beginning. The baby's changing table becomes a storage unit for toys, the base of the dresser becomes a bench and the dresser turns into a shelf. Just like at a real workshop. Everything is used, installed and stowed in drawers. From baby clothes to doll clothes and cars, everything has a place.
