

BIG TOM BARSTOOL

M RICHARD LAMPERT

D ALEXANDER SEIFRIED, 2012

Big Tom Barstool Little Tom's big brother features the same construction as the smaller version: a tubular steel frame and two cushions stacked one upon the other, together with combinable leather and textile covers create a comfortable and individual barstool for both private and commercial interiors. The stool is available in different heights, with the lower version (seat height: 74 cm) making for a great seat at the kitchen counter. With a seat height of 32.3", Big Tom is the perfect partner for sitting at the bar.

WOODEN SEAT D 13.8" x H 29.1" / 32.3"
 UPHOLSTERED SEAT D 14.6" x H 29.1" / 32.3"
