

TEKTUR STORAGE

M SANKTJOHANSER

The Tektur is a customizable shelf- and sideboard-system. It is available in HPL, multiply, oak veneer or solid oak. The materials of the shelves, doors and drawers can be mixed. The Tektur's width is customizable and four different storey heights can be chosen and combined according to the purpose and the desired design.

Tektur's sliding doors, drawers, flaps and back panels are flush mounted, characterizing is the fine shadow gap. one compartment at least has to have a back panel at each storey. TEKTUR K has inner dividers even to the front (no sliding doors possible). TEKTUR S has inner divider panels standing back to the front and /or back (sliding doors possible). Compartment width depends on the load and can be between 13.4" and 21.3" (solid oak 29.5").

W max. 141.7"
 D 9.8" / 13" / 16.2"
 H storeys 7.9" / 10.6" / 13.4" / 21.7"
